4-1: Tone of the news, 1945-2010 [blocked_external_source]

Figure 4-1 source-recovery comparison

Diagnostic only: original month-level data were not recovered; no Pinker plotted values were digitized.

Supplemental Graphics PDF reference

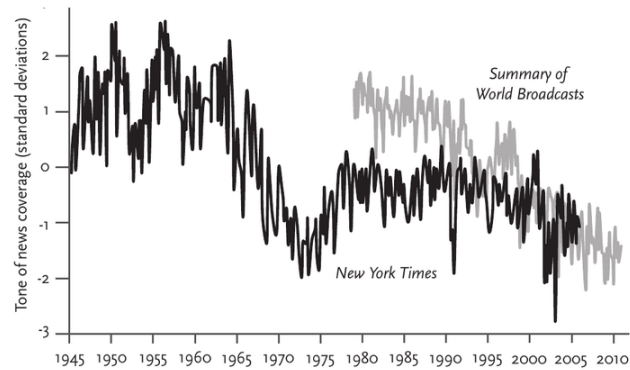

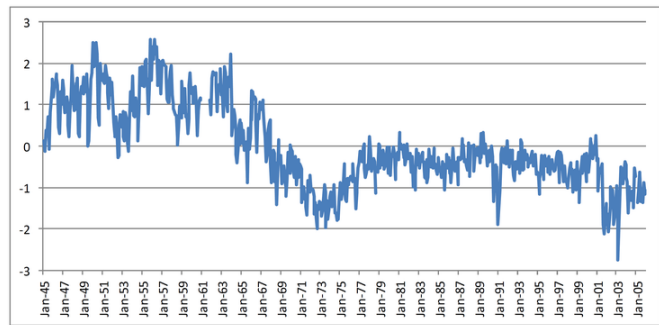

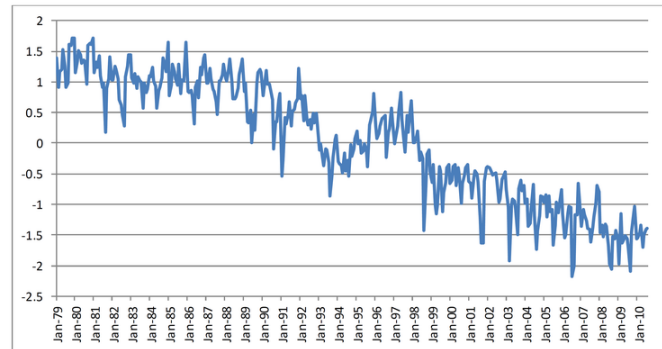

Figure 4-1: Tone of the news, 1945–2010

Source: Leetaru 2011. Plotted by month, beginning in January.

Leetaru/GDELT Fig. 10: NYT 1945-2005 PNG

Leetaru/GDELT Fig. 11: SWB 1979-2010 PNG

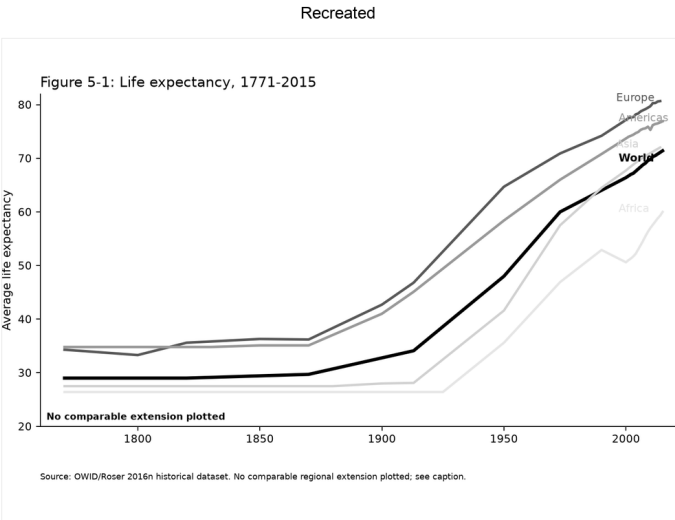

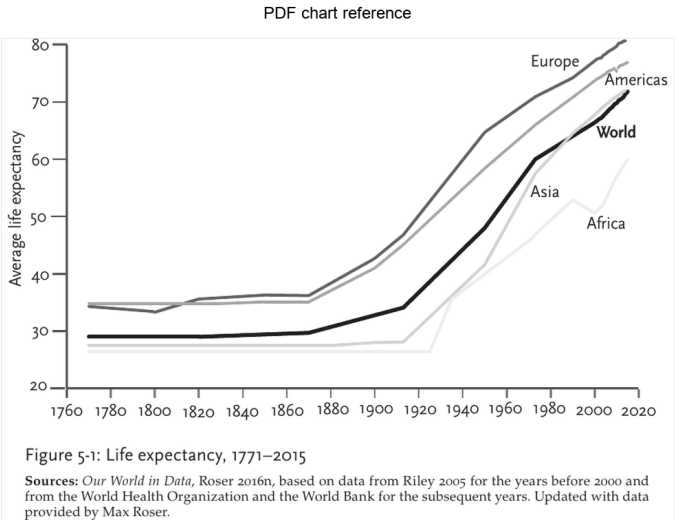

Book-period and extension comparisons remain blocked pending an inspectable NYT/SWB monthly tone data table.

Source-recovery-only diagnostic: Supplemental Graphics reference and Leetaru/GDELT source visuals recovered; original month-level NYT/SWB tone data were not recovered, and no Pinker plotted values were digitized.

5-1: Life expectancy, 1771-2015 [verified_reproduction]

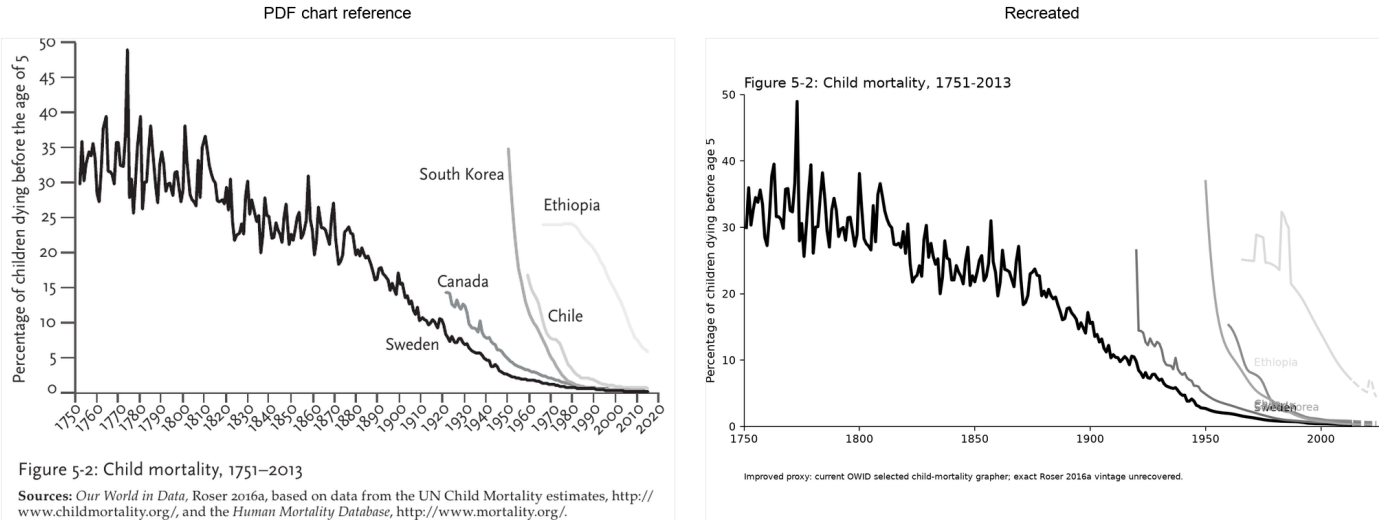

Figure 5-1 extended comparison

Book-period reconstruction is verified. The extended artifact intentionally plots no successor segment because a comparable regional successor series has not been accepted.

5-2: Child mortality, 1751-2013 [partial_match]

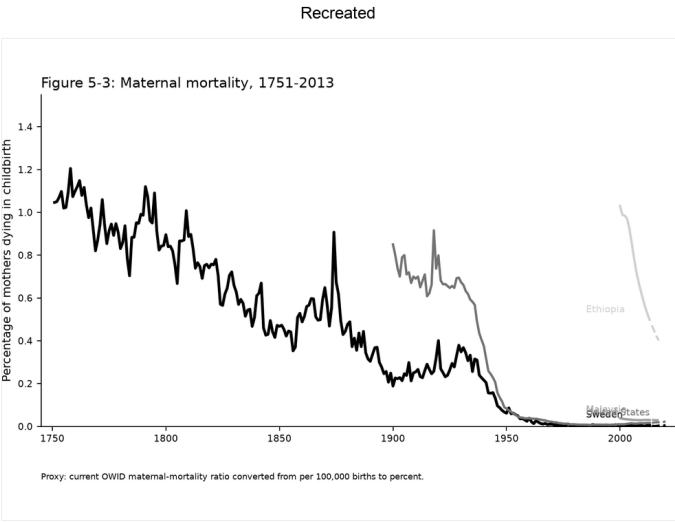

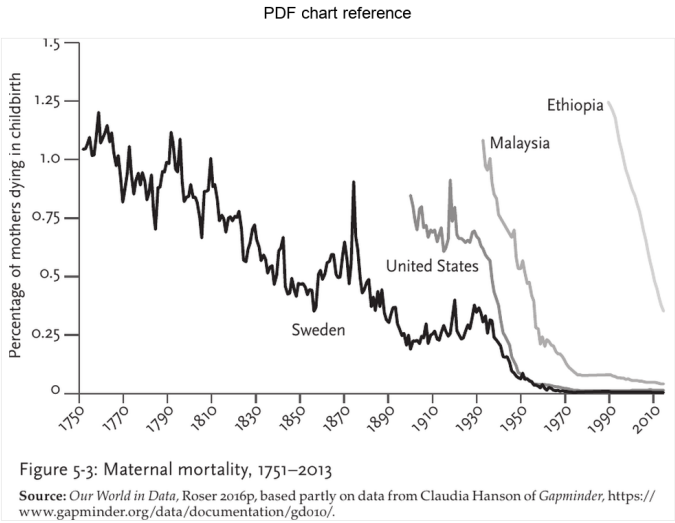

Figure 5-2 extended comparison

Remediated to use the current OVID selected child-mortality grapher directly in percent units. This materially improves the visual match, but the exact Roser 2016a UN/HMD vintage remains unrecovered.

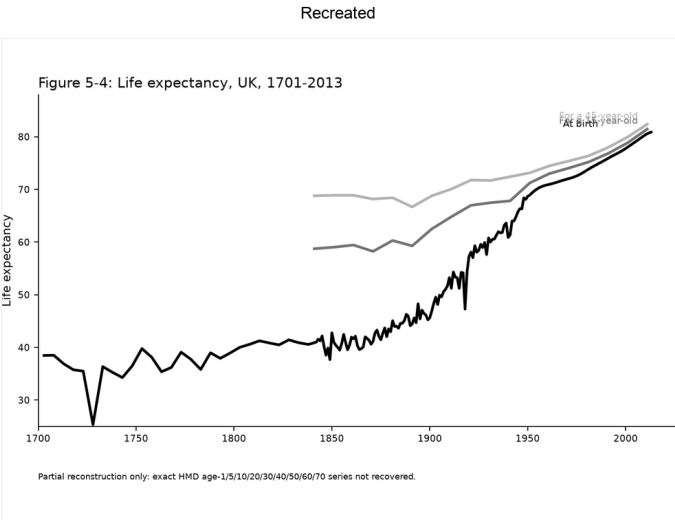

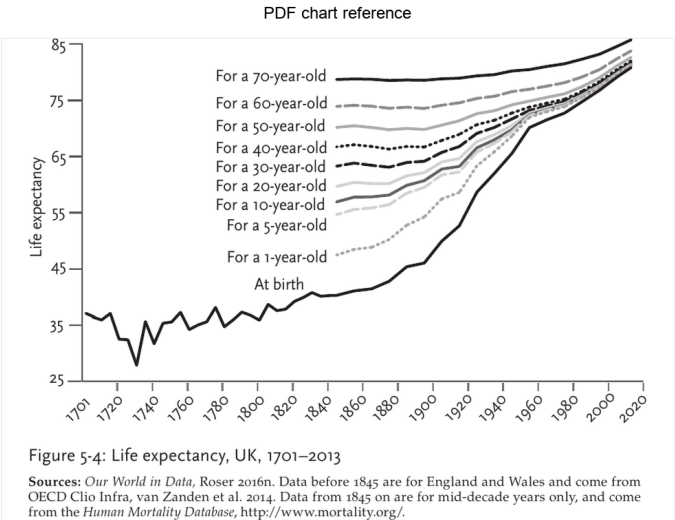

5-3: Maternal mortality, 1751-2013 [partial_match]

Figure 5-3 extended comparison

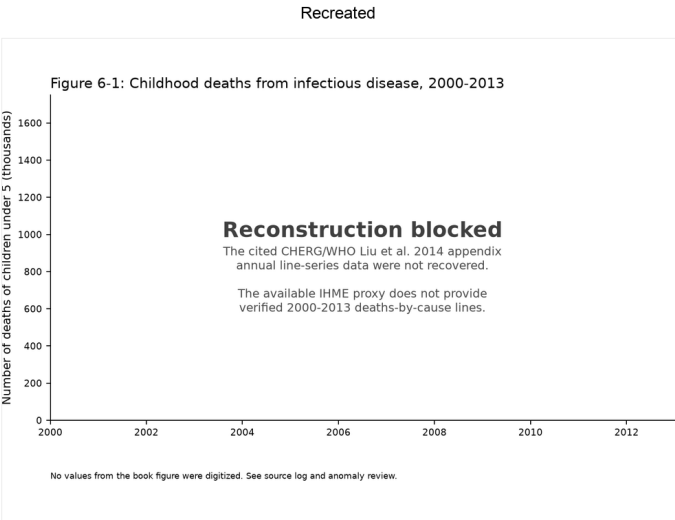

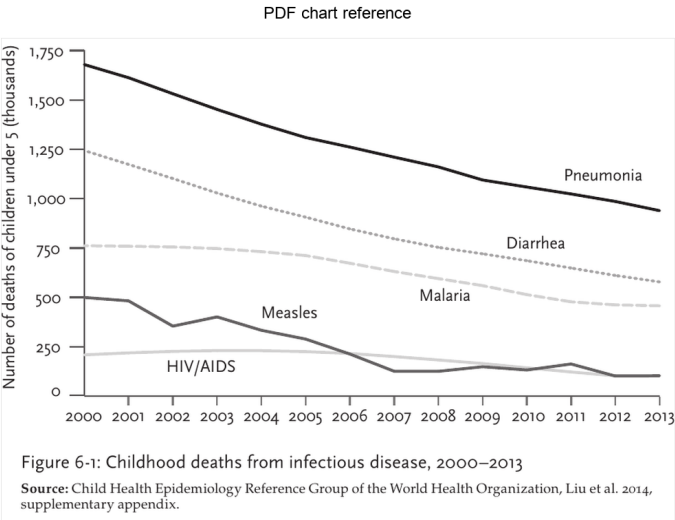

5-4: Life expectancy, UK, 1701-2013 [needs_targeted_source_recovery]

Figure 5-4 extended comparison

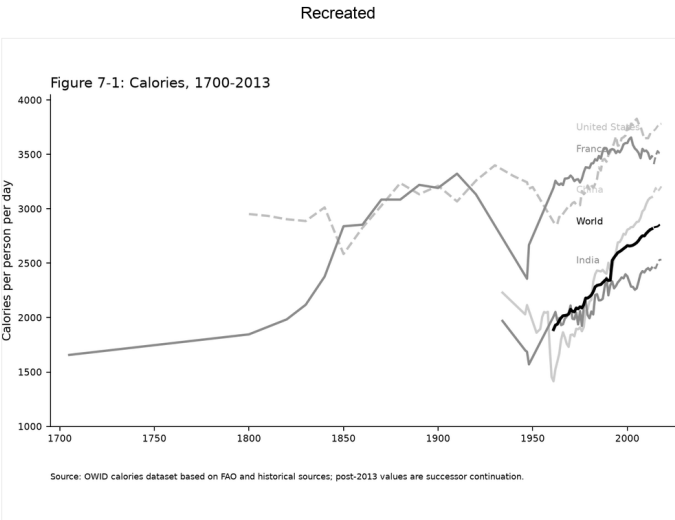

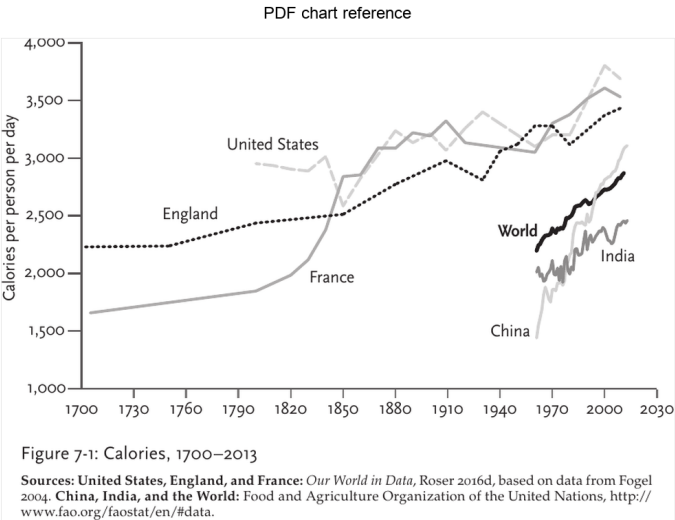

6-1: Childhood deaths from infectious disease, 2000-2013 [blocked_external_source]

Figure 6-1 extended comparison

7-1: Calories, 1700-2013 [partial_match]

Figure 7-1 extended comparison

7-2: Childhood stunting, 1966-2014 [partial_match]

Figure 7-2 extended comparison

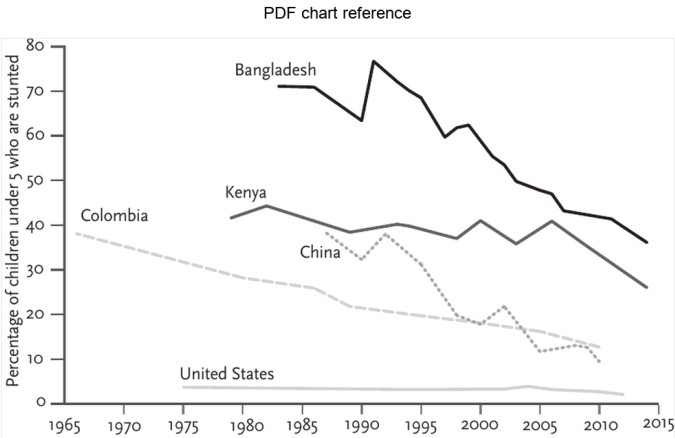

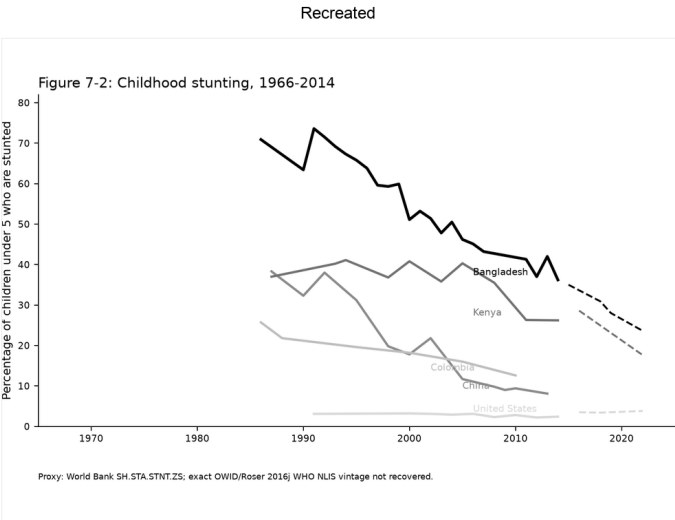

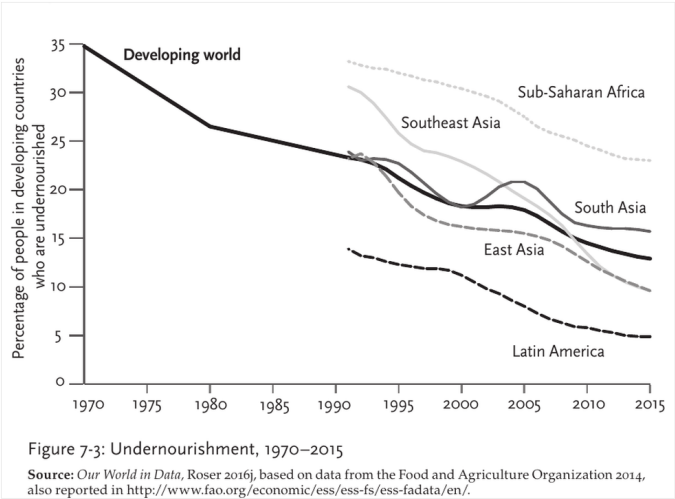

Figure 7-2: Childhood stunting, 1966–2014
Source: Our World in Data, Roser 2016j, based on data from the World Health Organization's Nutrition Landscape Information System, <http://www.who.int/nutrition/nlis/en/>.

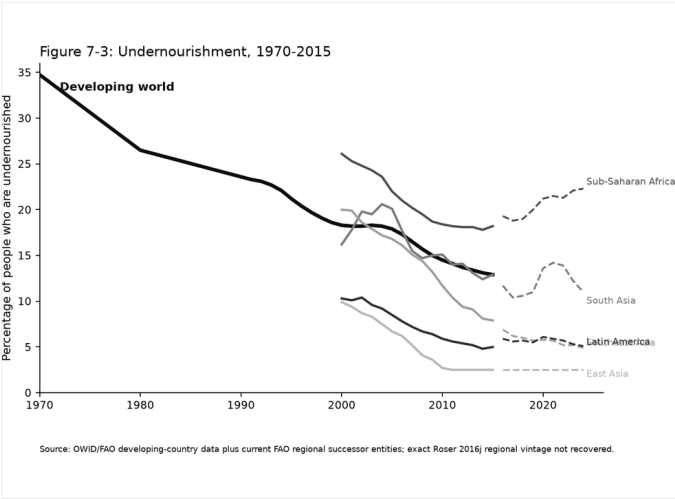

7-3: Undernourishment, 1970-2015 [partial_match]

Figure 7-3 extended comparison

Book/PDF reference

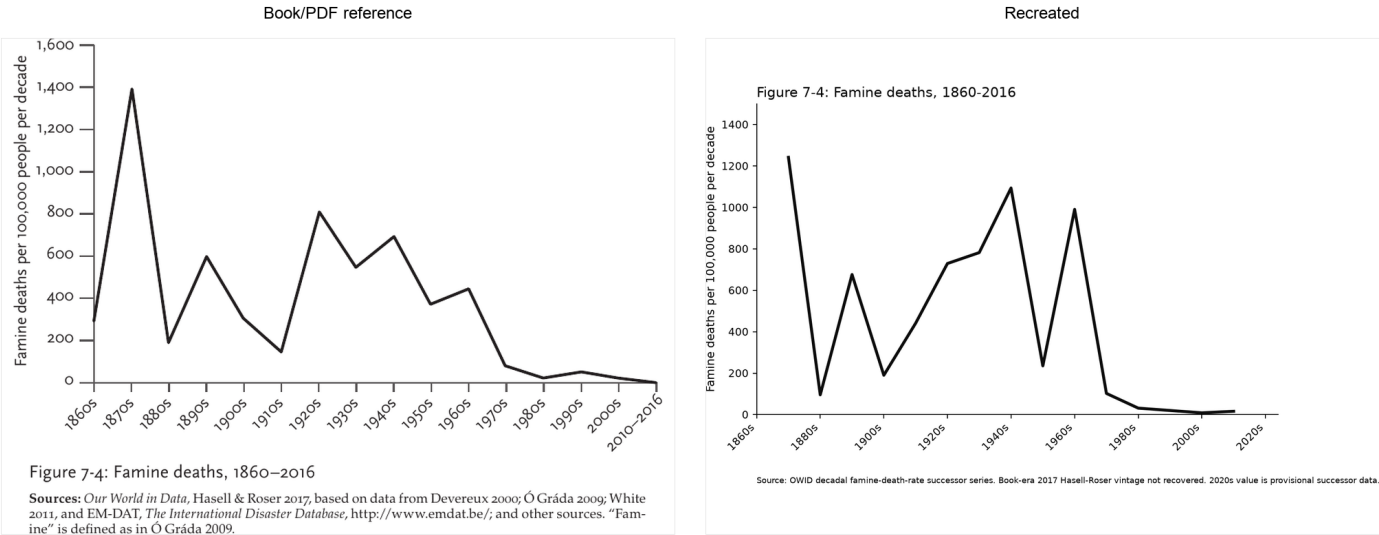

Recreated

Fresh review found that the prior reconstruction substituted broad Africa/Asia/World curves for several book regional curves. The remediation replaces those with current FAO successor regional entities where available, but the exact Roser 2016j/FAO 2014 regional vintage and 1991-1999 regional segments remain unrecovered.

7-4: Famine deaths, 1860-2016 [partial_match]

Figure 7-4 extended comparison

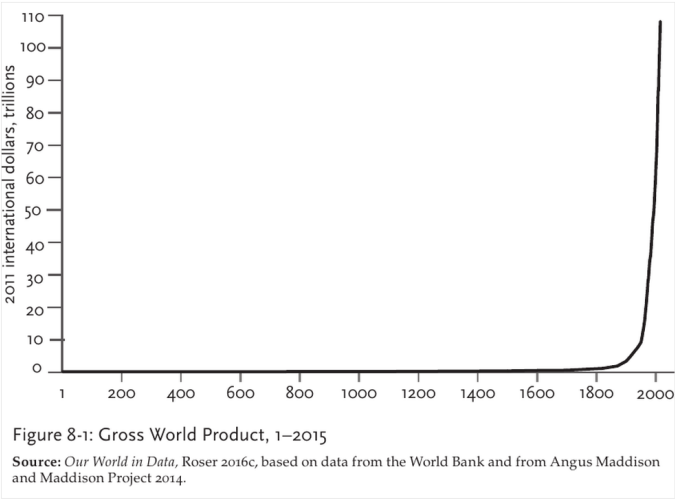

The previous reconstruction recomputed rates from an event table with a current population denominator. Remediation uses OWID's explicit decadal famine-death-rate grapher series, which fixes the aggregation treatment, but it is a 2025 World Peace Foundation/OWID successor rather than the archived 2017 Hasell-Roser book vintage.

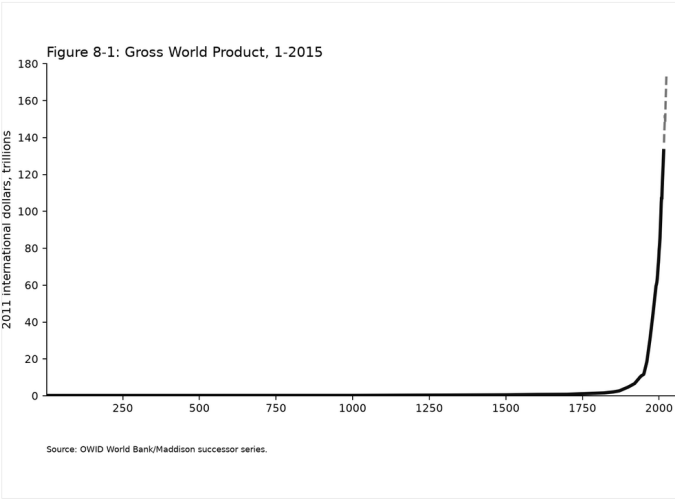

8-1: Gross World Product, 1-2015 [updated_equivalent]

Figure 8-1 extended comparison

Book/PDF reference

Recreated

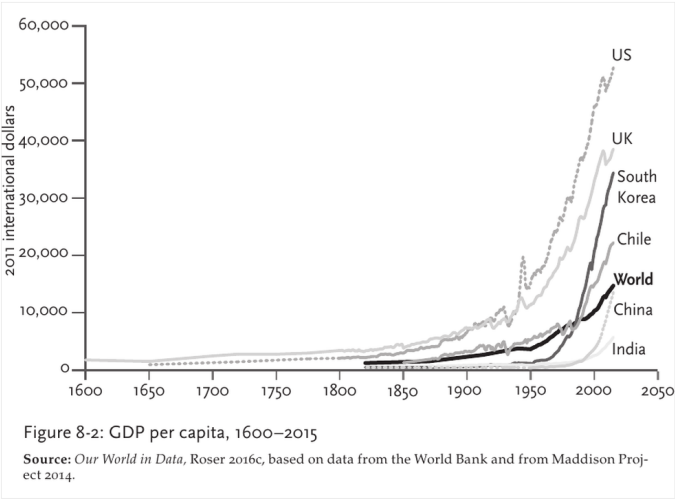

The successor OWID/Maddison/World Bank series preserves the hockey-stick shape and book-period coverage, but the 2015 scale is materially above the printed figure's apparent endpoint, so this is an updated equivalent rather than an exact reproduction.

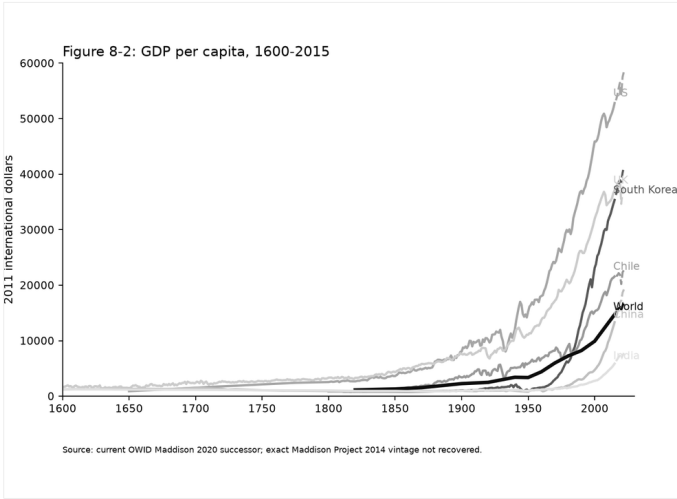

8-2: GDP per capita, 1600-2015 [updated_equivalent]

Figure 8-2 extended comparison

Book/PDF reference

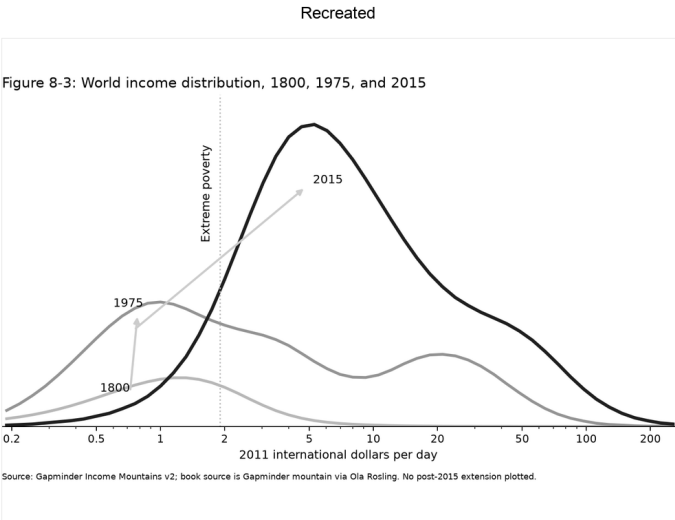

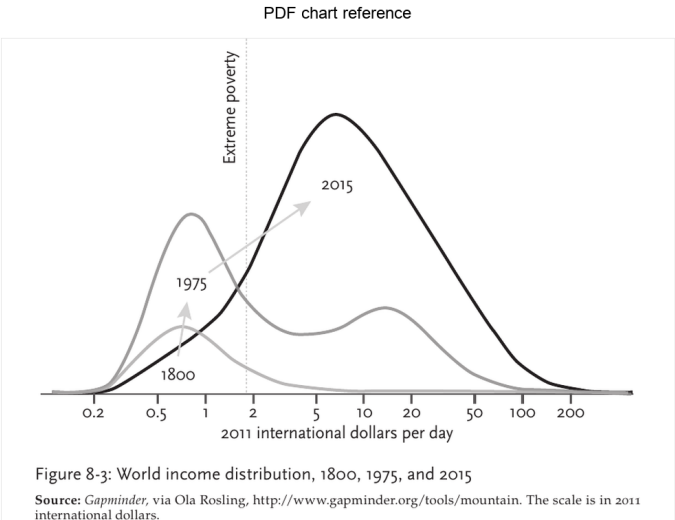

Recreated

The selected countries and line ordering broadly match the book, but current Maddison 2020/OWID data are not the cited Maddison Project 2014/World Bank 2016 vintage. Remaining differences are not typography-only.

8-3: World income distribution, 1800, 1975, and 2015 [updated_equivalent]

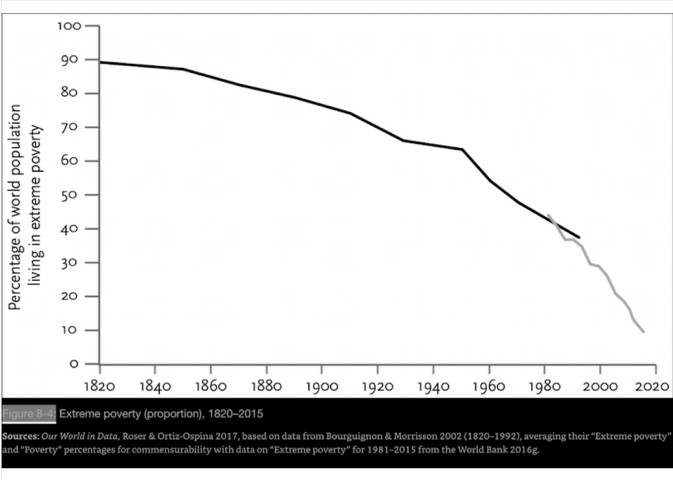

Figure 8-3 extended comparison

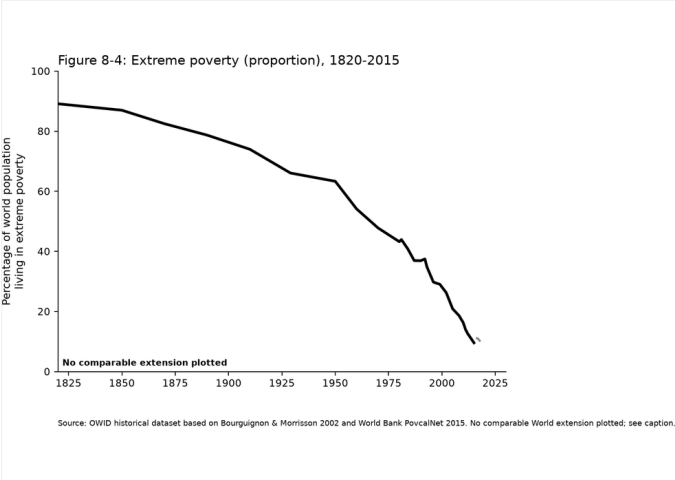

8-4: Extreme poverty (proportion), 1820-2015 [verified_reproduction]

Figure 8-4 extended comparison

Kindle reference

Recreated

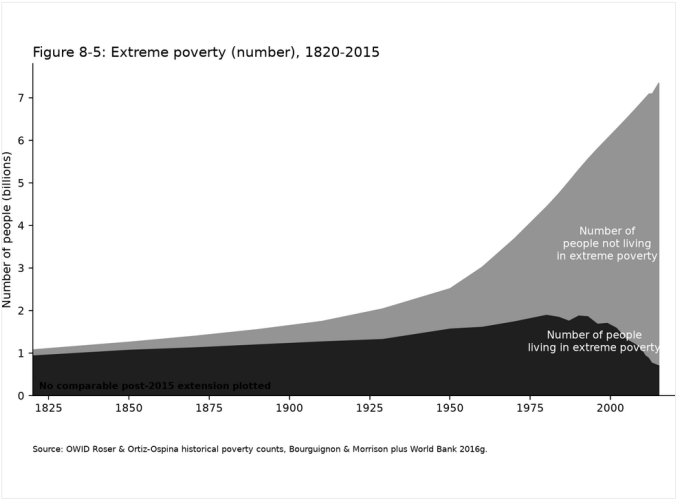

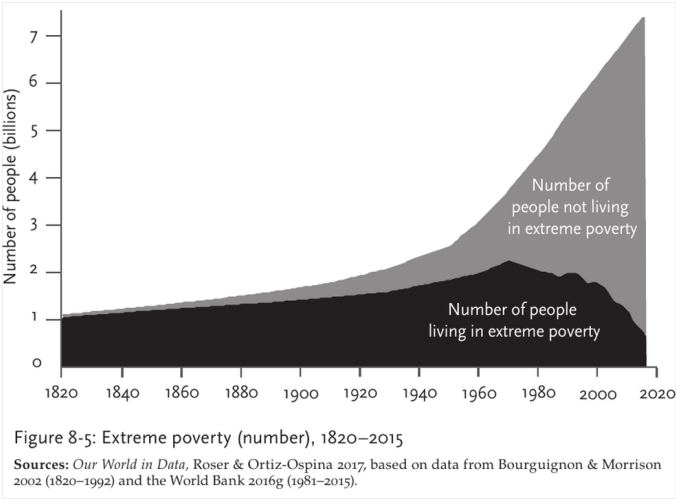

Book-period reconstruction is verified. The comparison layout was remediated so the recreated plot area is comparable to the Kindle crop; no comparable world extension is plotted.

8-5: Extreme poverty (number), 1820-2015 [verified_reproduction]

Figure 8-5 extended comparison

Book/PDF reference

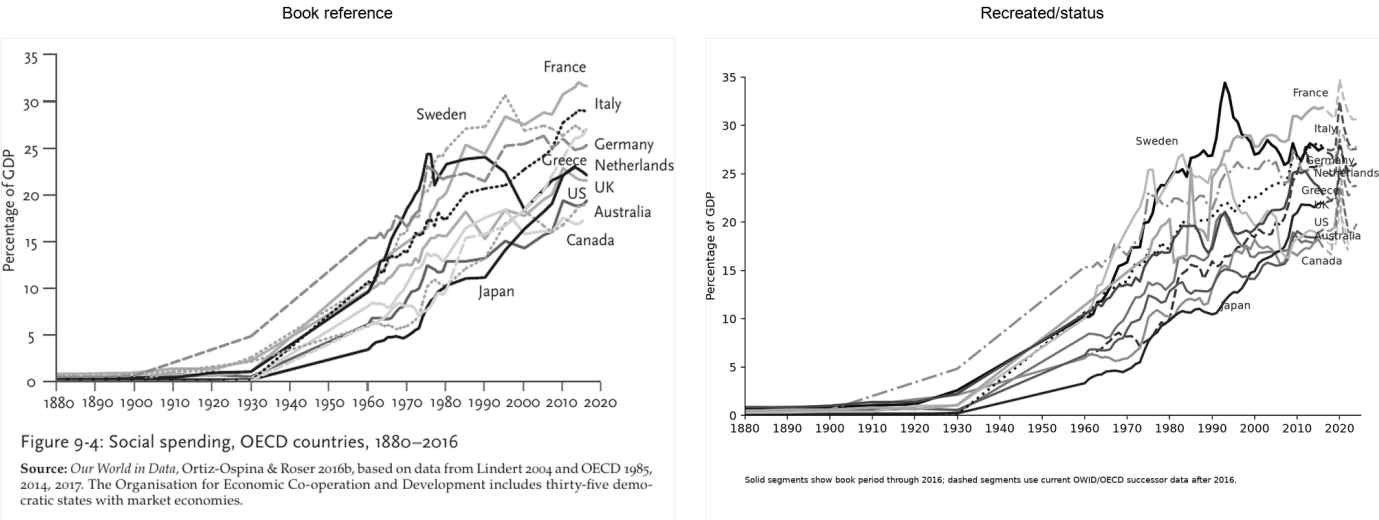

Recreated

A falsification audit found no material source, encoding, or endpoint issue. The reconstruction uses the cited OWID historical absolute-count series and matches the stacked-area visual claim; remaining differences are production styling only.

9-4: Social spending, OECD countries, 1880-2016 [updated_equivalent]

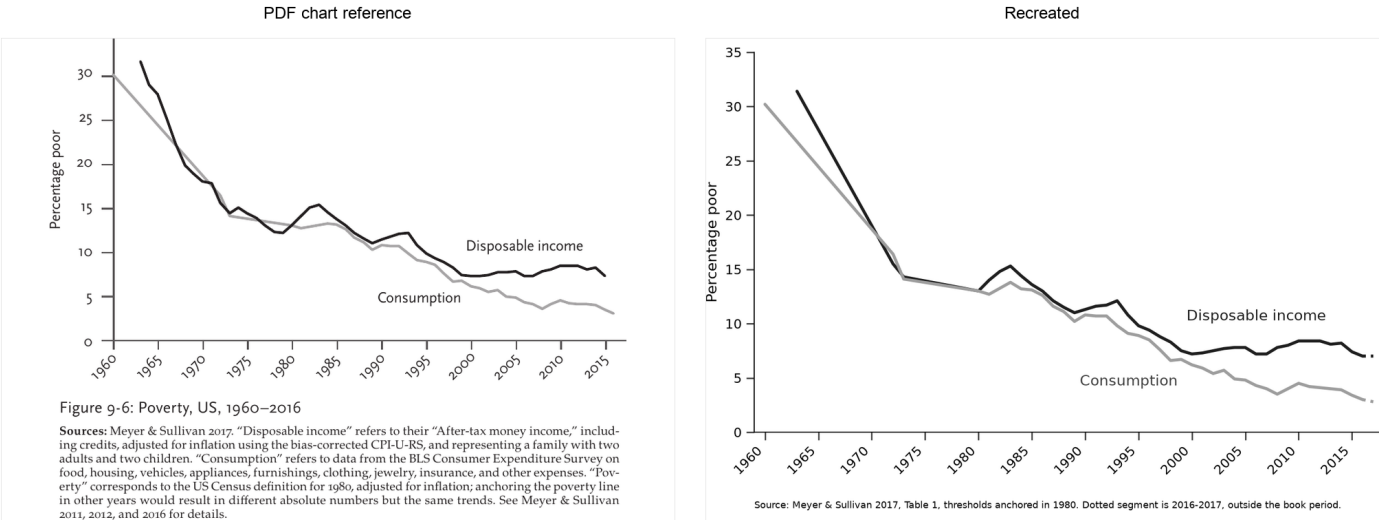

Figure 9-4 extended comparison

For verification, recover the exact OWID Ortiz-Ospina & Roser 2016b/2017 chart data snapshot; otherwise keep updated_equivalent status.

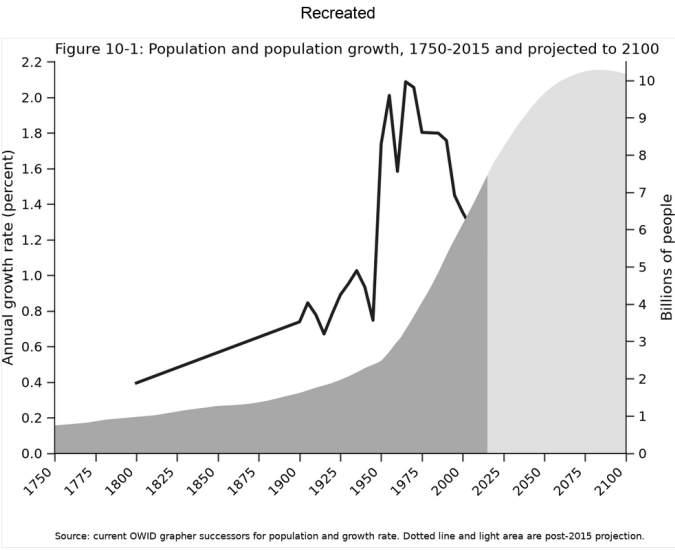

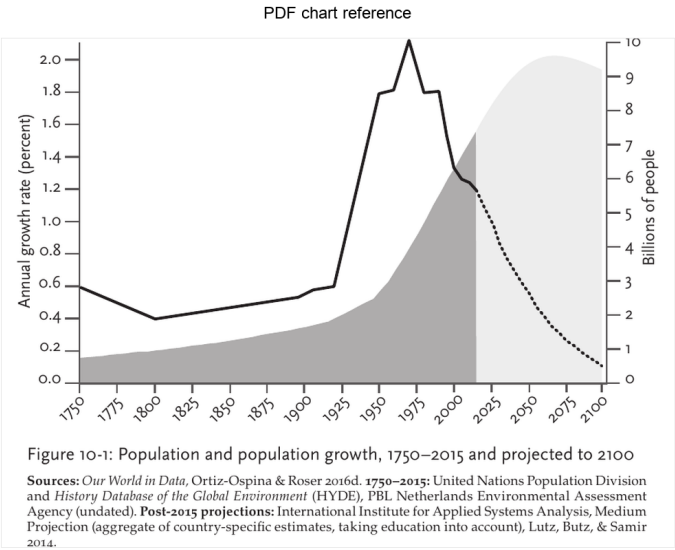

9-6: Poverty, US, 1960-2016 [verified_reproduction]

Figure 9-6 extended comparison

10-1: Population and population growth, 1750-2015 and projected to 2100 [updated_equivalen

Figure 10-1 extended comparison

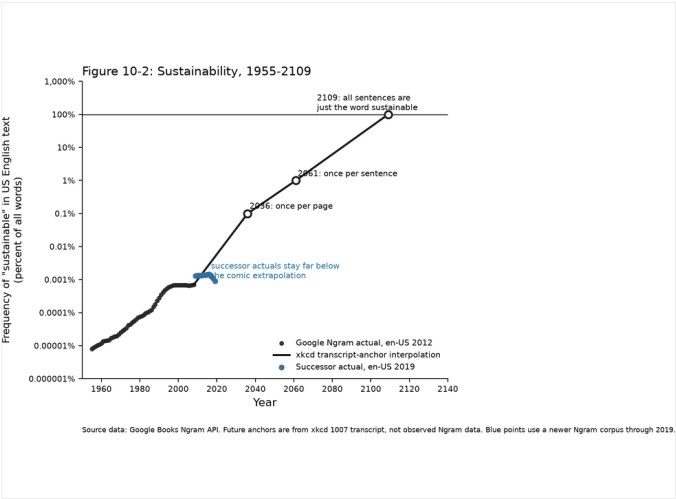

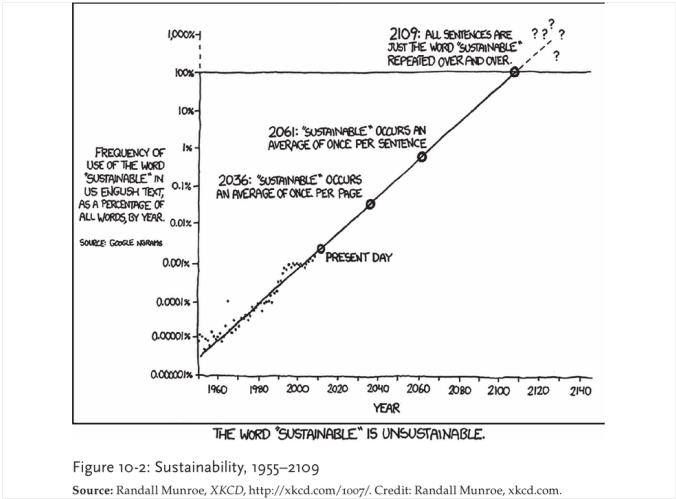

10-2: Sustainability, 1955-2109 [updated_equivalent]

Figure 10-2 Extended Comparison

Supplemental PDF reference

Recreated from recovered source data

xkcd source page/image and Google Ngram source data recovered. Exact xkcd future fitting method is unpublished; future anchors are transcript-derived and separately labeled. No Pinker plotted values were digitized.

10-5: Oil spills, 1970-2016 [partial_match]

Figure 10-5 original reference

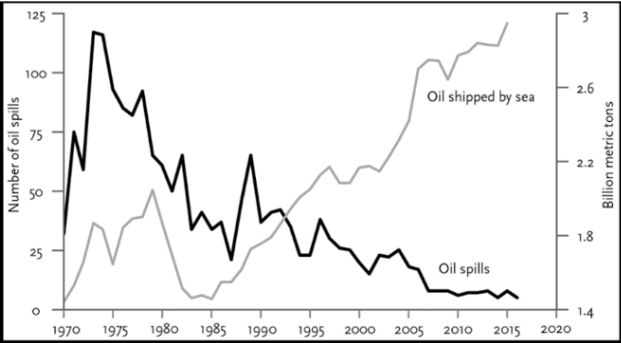

Figure 10-5: Oil spills, 1970–2016

Source: *Our World in Data*, Roser 2016r, based on data (updated) from the International Tanker Owners Pollution Federation, <http://www.itopf.com/knowledge-resources/data-statistics/statistics/>. Oil spills include all those that result in the loss of at least 7 metric tons of oil. Oil shipped consists of “total crude oil, petroleum product, and gas loaded.”

Extended reconstruction

Solid: book period through 2016. Dotted: post-book updates; tanker-trade mirror extends to 2020, spill counts to 2025.

Current repository state: oil-spill line supported; exact annual oil-shipping gray-line source unresolved. See figures/10-5/.

10-6: Protected areas, 1990-2014 [verified_reproduction]

Figure 10-6 original reference

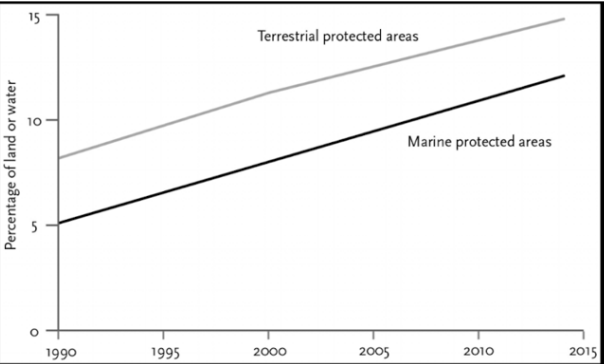

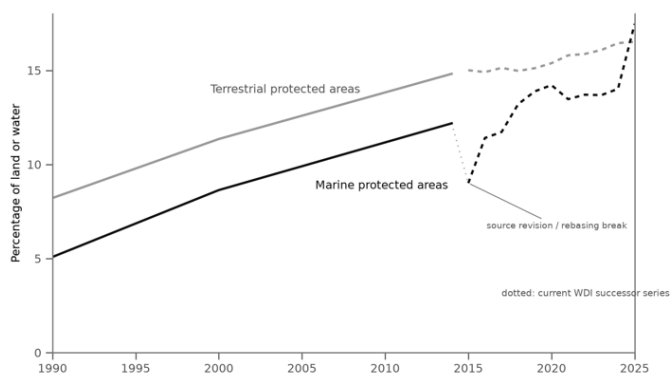

Figure 10-6: Protected areas, 1990–2014

Source: World Bank 2016h and 2017, based on data from the United Nations Environment Programme and the World Conservation Monitoring Centre, compiled by the World Resources Institute.

Extended reconstruction

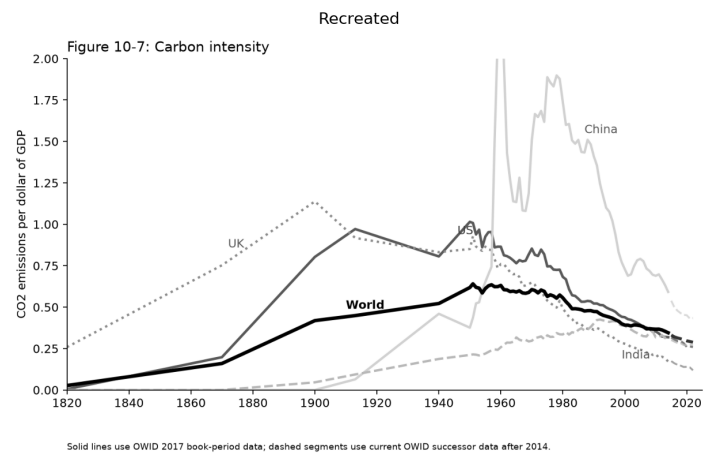

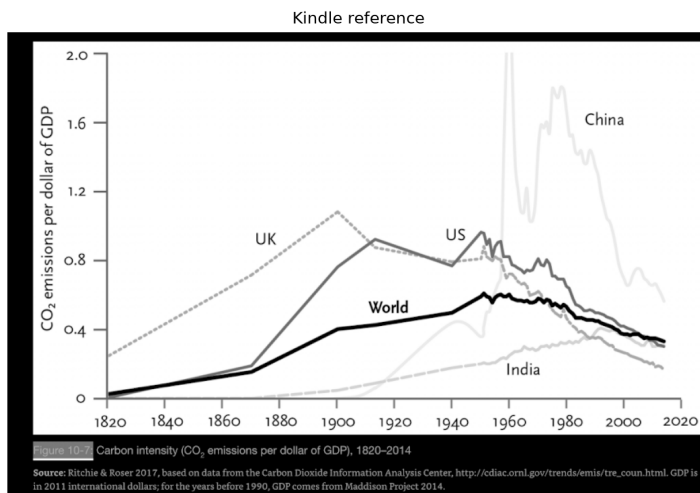

Solid: archived WDI 2017 book period. Dotted: current WDI successor values; marine break reflects source revision/rebasing, not plotting error.

Current repository state: archived WDI 2017 source verifies book-period reconstruction; extension is successor current WDI series. See figures/10-6/.

10-7: Carbon intensity (CO2 emissions per dollar of GDP), 1820-2014 [verified_reproduction]

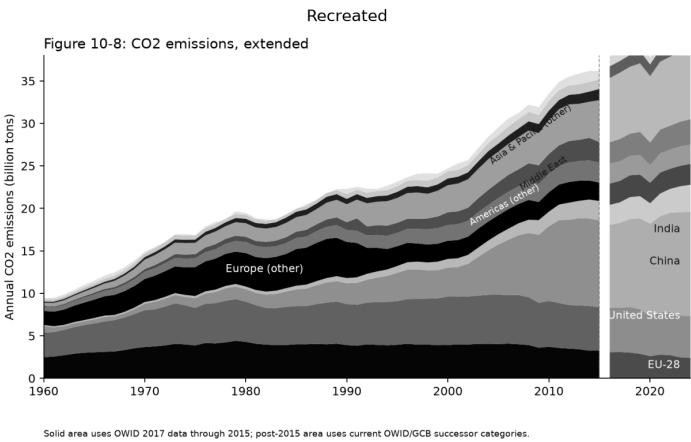

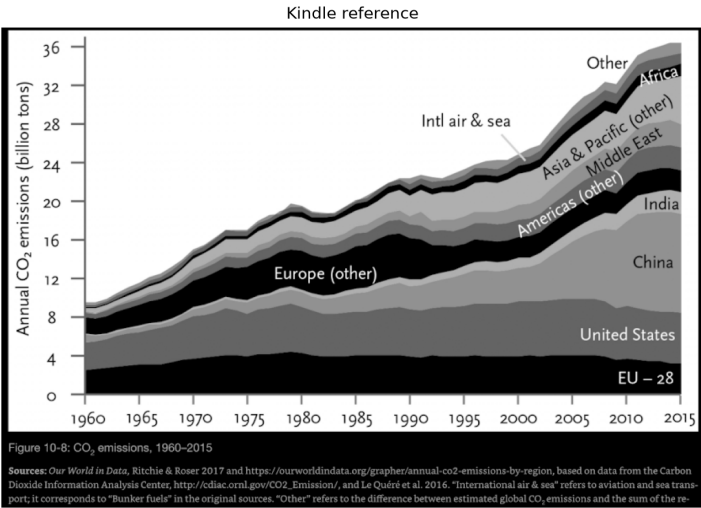

Figure 10-7 extended comparison

Book-period source and visual geometry closely match. Extension is useful but explicitly successor-series only.

10-8: CO2 emissions, 1960-2015 [verified_reproduction]

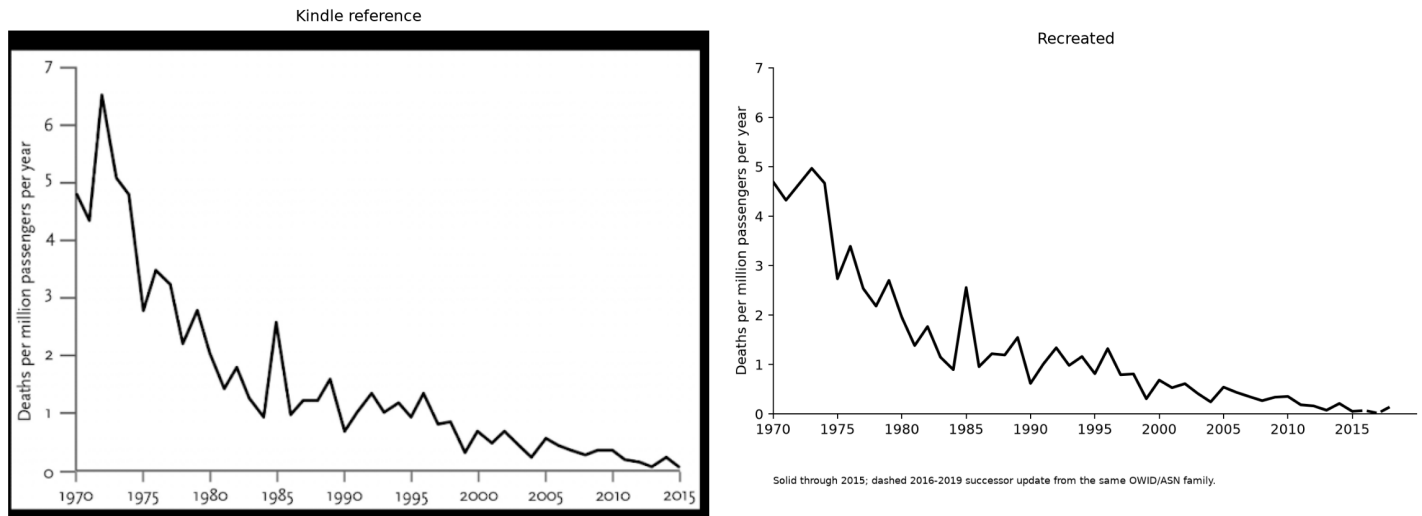

Figure 10-8 extended comparison

Book-period stack uses the exact OWID 2017 regional CDIAC dataset named by the source chain. Extension is visually separated by a 2015 boundary because source definitions changed.

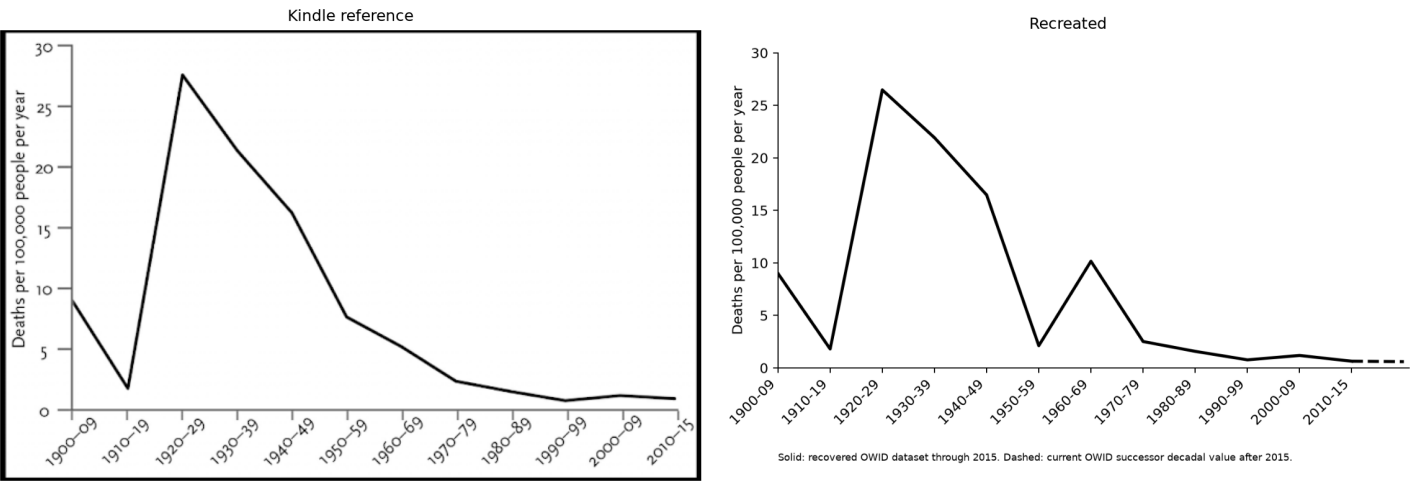

12-5: Plane crash deaths, 1970-2015 [partial_match]

Figure 12-5 extended comparison

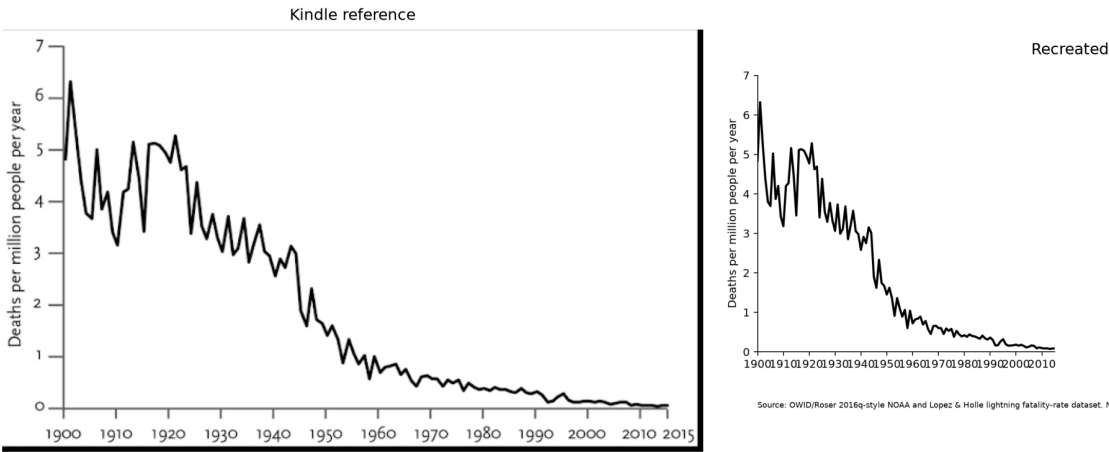

12-8: Natural disaster deaths, 1900-2015 [updated_equivalent]

Figure 12-8 extended comparison

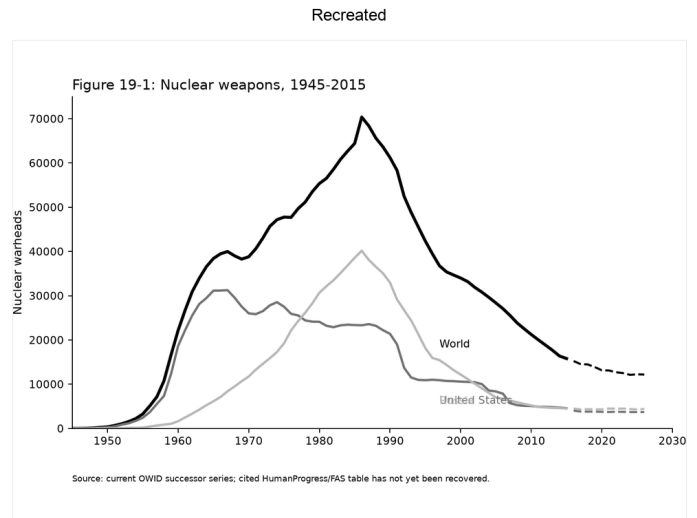

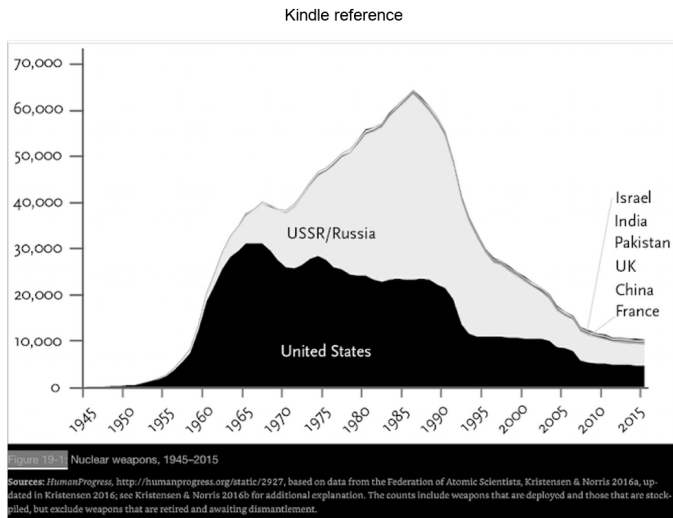

12-9: Lightning strike deaths, US, 1900-2015 [verified_reproduction]

Figure 12-9 extended comparison

19-1: Nuclear weapons, 1945-2015 [partial_match]

Figure 19-1 extended comparison

Actual Kindle chart-page capture is now present. The reconstruction remains partial because it uses a current OWID successor line series rather than the cited *HumanProgress/FAS* 2016 table and does not reproduce the book's stacked-area presentation.
