5-1 - Life expectancy, 1771-2015 (verified_reproduction)

Book-period reconstruction is verified. The extended artifact intentionally plots no successor segment because a comparable regional successor series has not been accepted

7-3 - Undernourishment, 1970-2015 (partial_match)

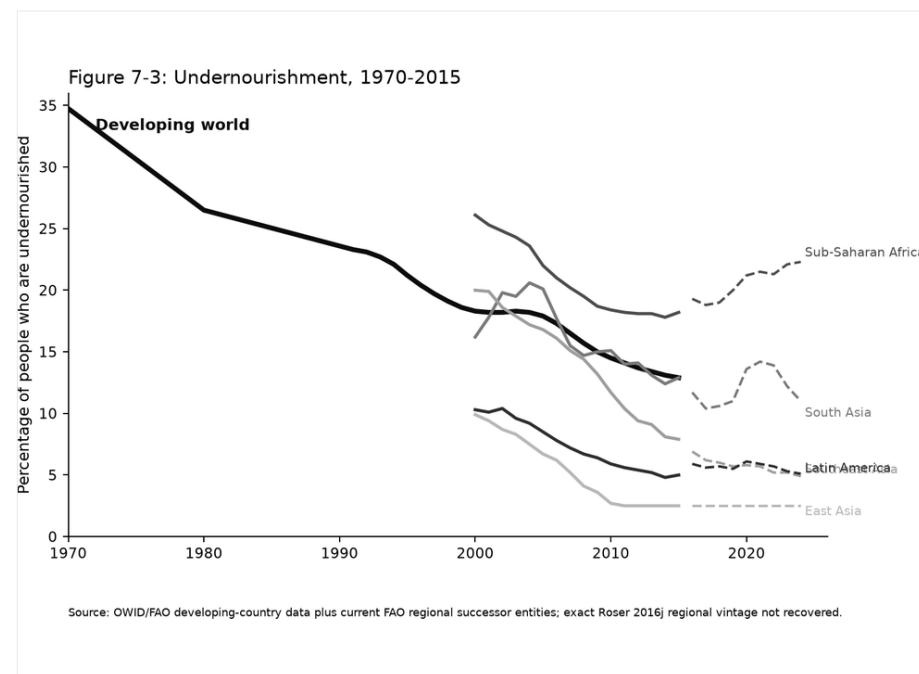

Fresh review found that the prior reconstruction substituted broad Africa/Asia/World curves for several book regional curves. The remediation replaces those with current

7-4 - Famine deaths, 1860-2016 (partial_match)

The previous reconstruction recomputed rates from an event table with a current population denominator. Remediation uses OWID's explicit decadal famine-death-rate grapher

8-1 - Gross World Product, 1-2015 (updated_equivalent)

The successor OWID/Maddison/World Bank series preserves the hockey-stick shape and book-period coverage, but the 2015 scale is materially above the printed figure's appar

Source: *Our World in Data*, Roser 2016r, based on data (updated) from the International Tanker Owners Pollution Federation, <http://www.itopf.com/knowledge-resources/data-statistics/statistics/>. Oil spills include all those that result in the loss of at least 7 metric tons of oil. Oil shipped consists of “total crude oil, petroleum product, and gas loaded.”

Extended reconstruction

Solid: book period through 2016. Dotted: post-book updates; tanker-trade mirror extends to 2020, spill counts to 2025.

10-6 - Protected areas, 1990-2014 (verified_reproduction)

Current repository state: archived WDI 2017 source verifies book-period reconstruction; extension is successor current WDI series. See figures/10-6/.

10-7 - Carbon intensity (CO₂ emissions per dollar of GDP), 1820-2014 (verified_reproduction)

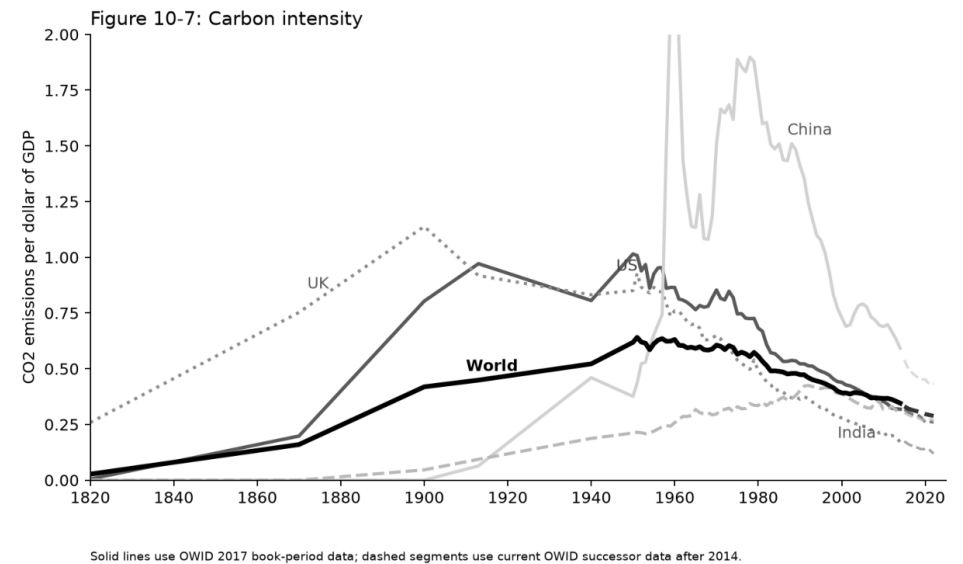

Book-period source and visual geometry closely match. Extension is useful but explicitly successor-series only.

19-1 - Nuclear weapons, 1945-2015 (partial_match)

Actual Kindle chart-page capture is now present. The reconstruction remains partial because it uses a current OWID successor line series rather than the cited HumanProgre
