

Recreated Figures Review Scroll

Generated 2026-07-05; 27 comparison/status items.

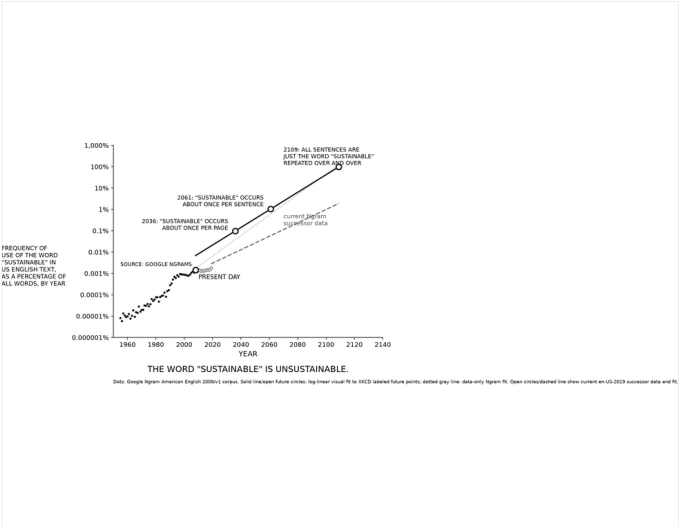

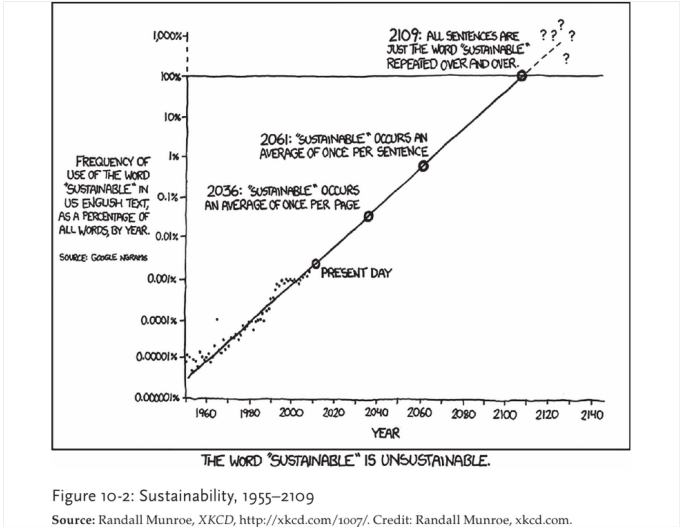

10-2: Sustainability, 1955-2109 [updated_equivalent]

Official XKCD/PDF references recovered; future markers derive from one XKCD-label visual projection, with Ngram candidate threshold

Figure 10-2 extended comparison

Supplemental PDF reference

Recreated from Ngram data

4-1: Tone of the news, 1945-2010 [manual_review_needed]

Deeper source recovery completed; no reconstruction because original monthly data remain unresolved. Status panels are not reconst

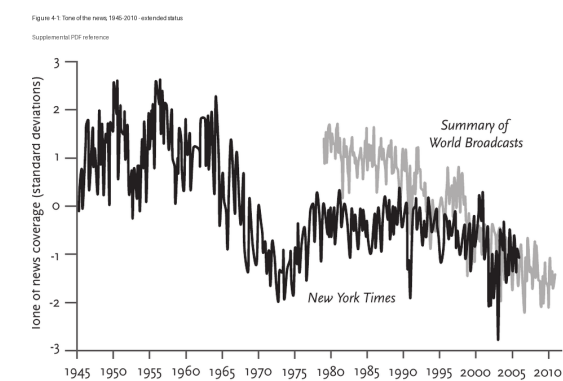

Figure 4-1: Tone of the news, 1945–2010
Source: Leetaru 2011. Plotted by month, beginning in January.

Source recovery status panel

Figure 4-1: Tone of the news, 1945-2010

Source recovery blocked

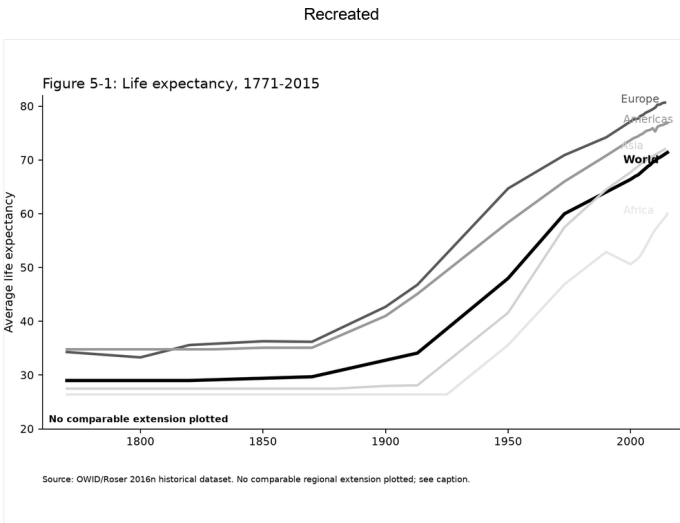

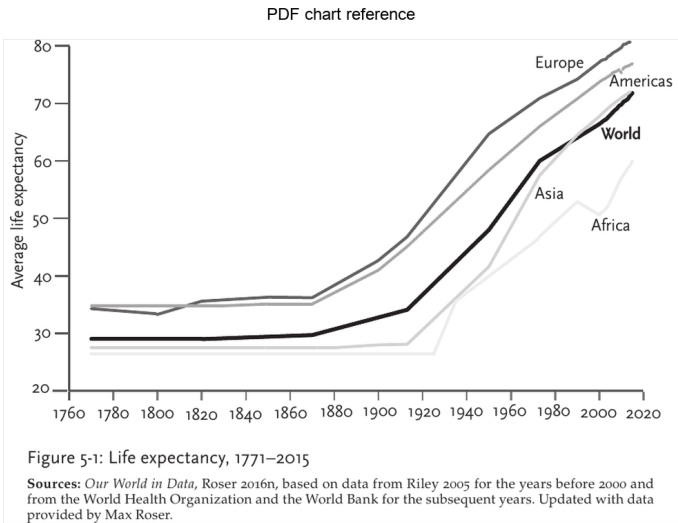

No accepted underlying monthly data table was recovered.
Leetaru/GDELT high-resolution PNGs were preserved as source-chain evidence only.
The book/supplemental chart and Leetaru plot images were not digitized as data.
Required next step: recover the original monthly NYT and SWB tone series,
or a reproducible extraction from the original text corpora and sentiment method.
No extension is plotted until the book-period source is recovered.

Status: manual_review_needed | Visual artifact is a status panel, not a reconstruction.

5-1: Life expectancy, 1771-2015 [verified_reproduction]

Book-period reconstruction is verified. The extended artifact intentionally plots no successor segment because a comparable region

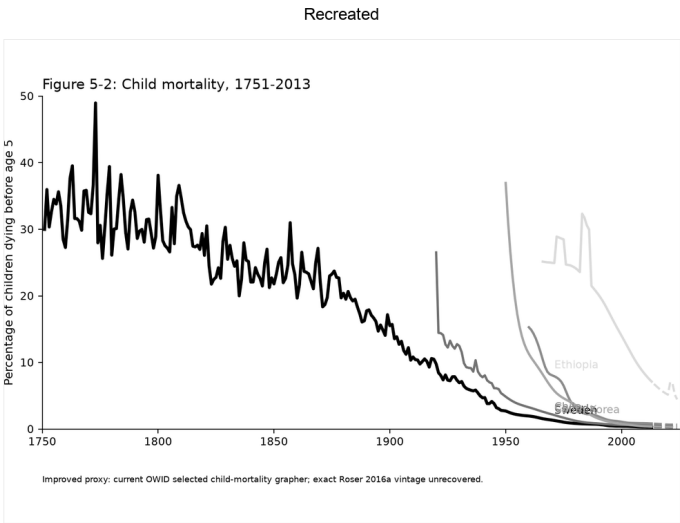

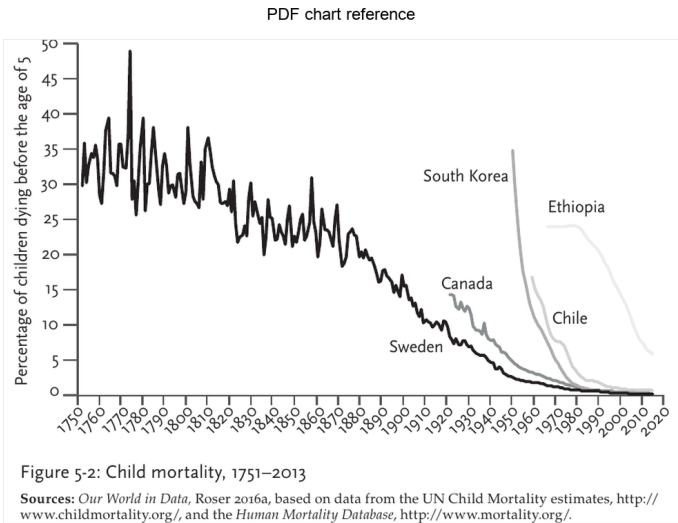

Figure 5-1 extended comparison

5-2: Child mortality, 1751-2013 [partial_match]

Remediated to use the current OWID selected child-mortality grapher directly in percent units. This materially improves the visual

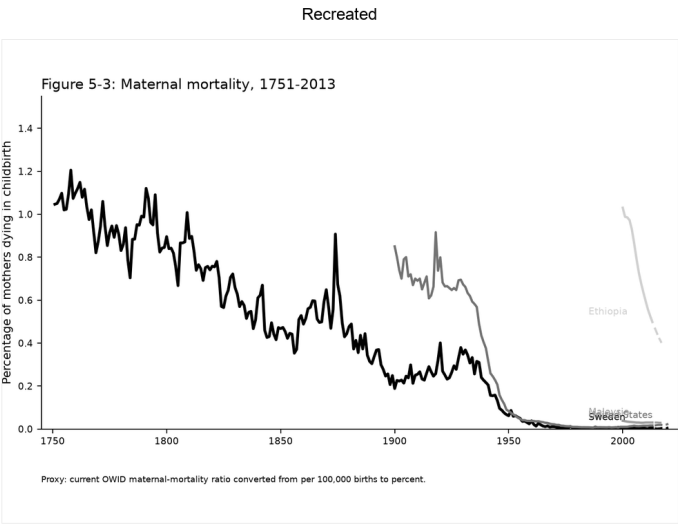

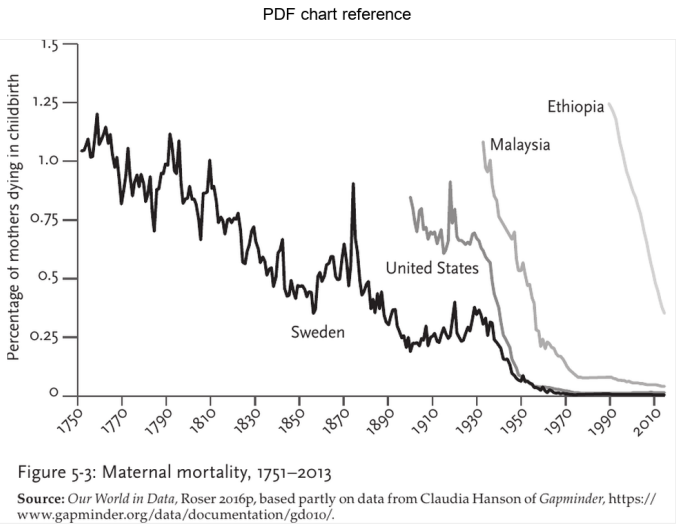

Figure 5-2 extended comparison

5-3: Maternal mortality, 1751-2013 [partial_match]

Track A health/nutrition batch. Source status: updated_equivalent.

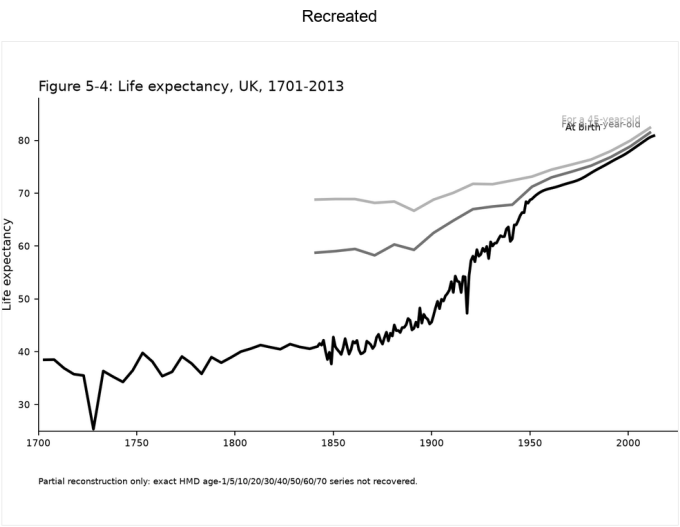

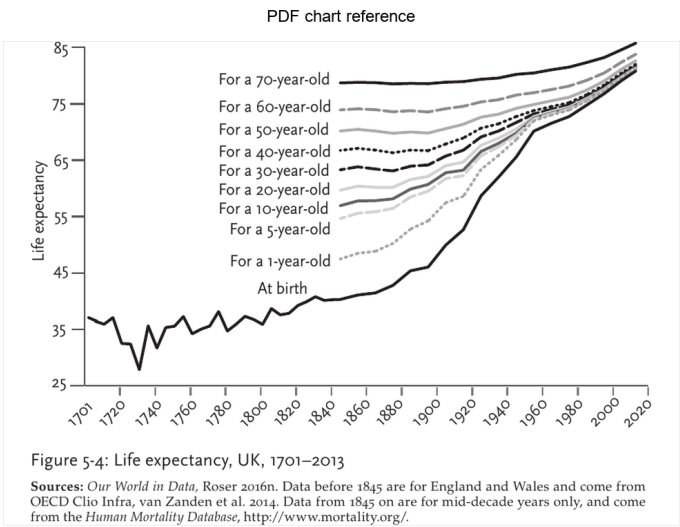

Figure 5-3 extended comparison

5-4: Life expectancy, UK, 1701-2013 [needs_targeted_source_recovery]

Track A health/nutrition batch. Source status: needs_targeted_source_recovery.

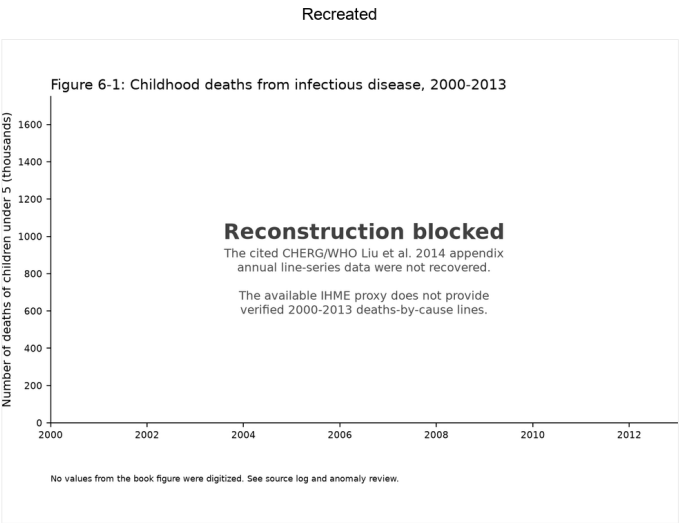

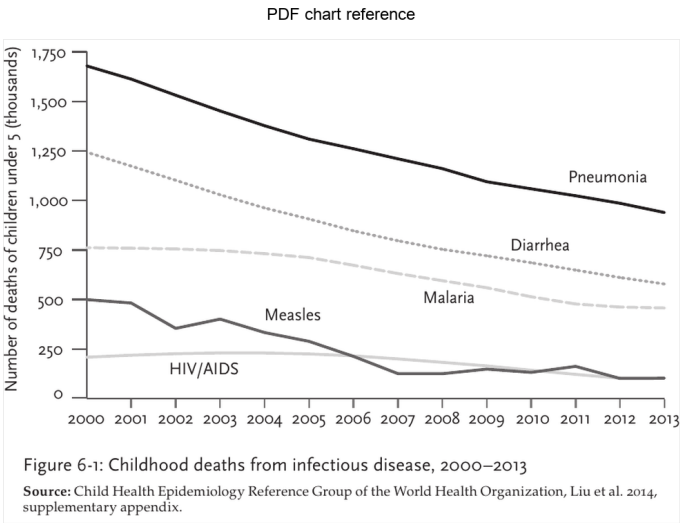

Figure 5-4 extended comparison

6-1: Childhood deaths from infectious disease, 2000-2013 [blocked_external_source]

Track A health/nutrition batch. Source status: blocked_external_source.

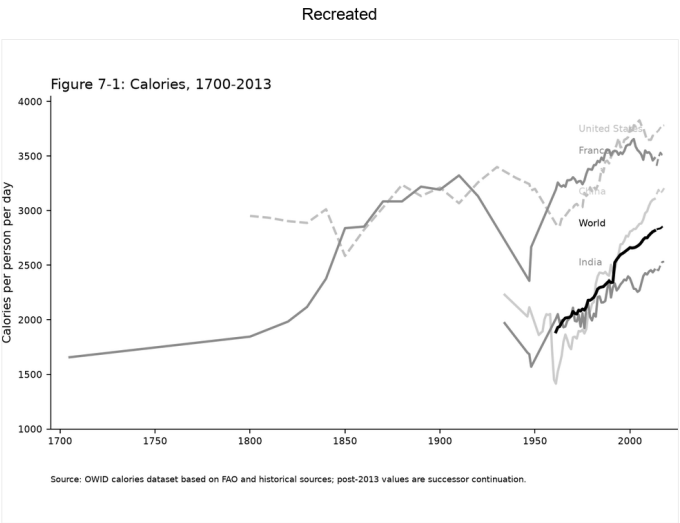

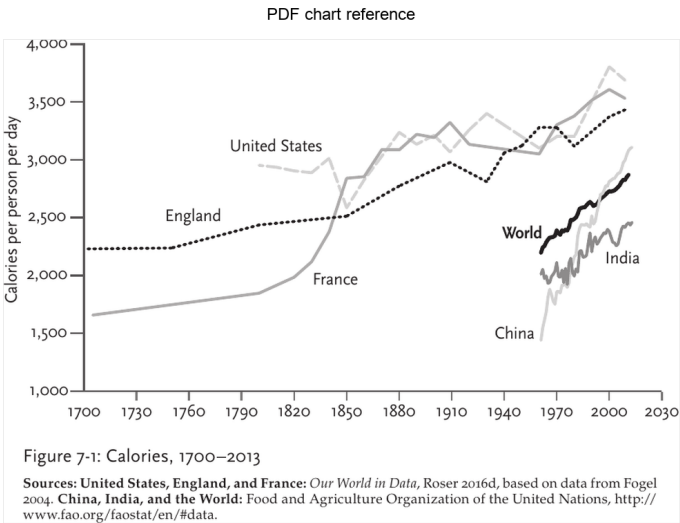

Figure 6-1 extended comparison

7-1: Calories, 1700-2013 [partial_match]

Track A health/nutrition batch. Source status: updated_equivalent.

Figure 7-1 extended comparison

7-2: Childhood stunting, 1966-2014 [partial_match]

Track A health/nutrition batch. Source status: partial_match.

Figure 7-2 extended comparison

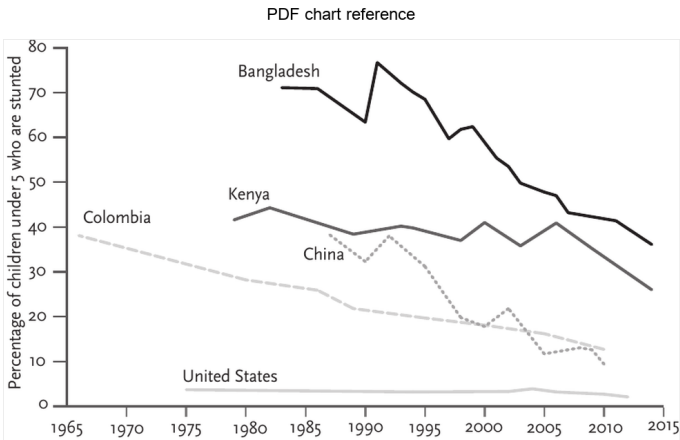

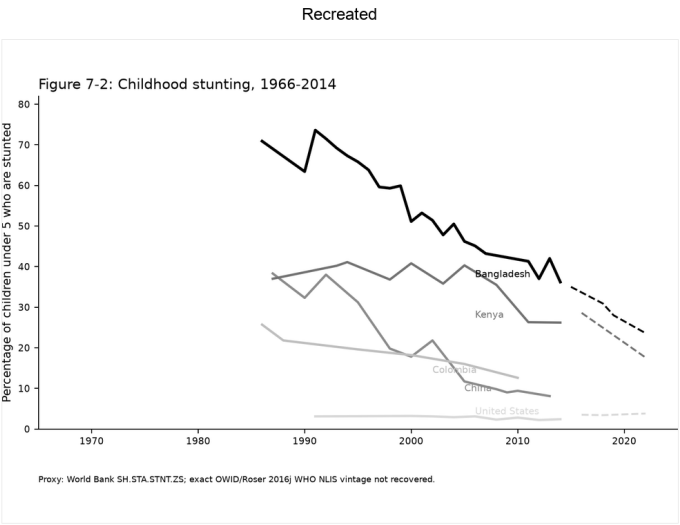

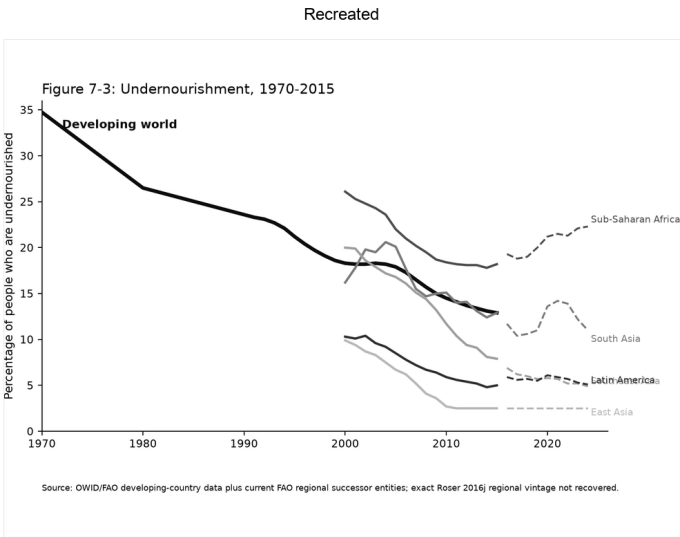

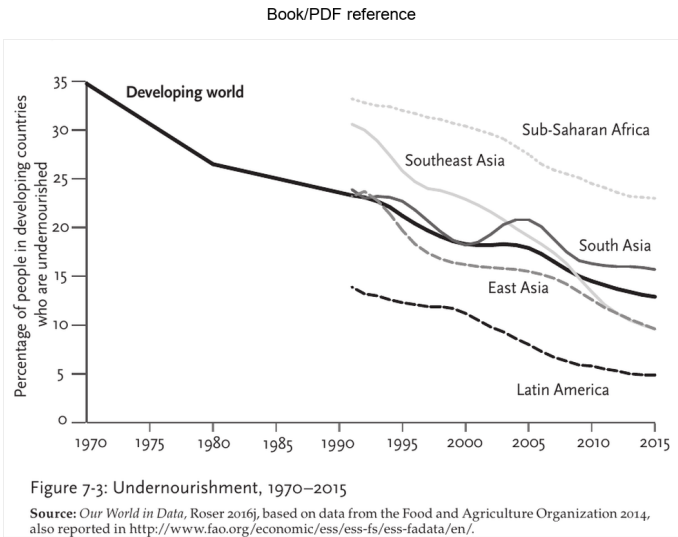

Figure 7-2: Childhood stunting, 1966–2014
Source: Our World in Data, Roser 2016j, based on data from the World Health Organization's Nutrition Landscape Information System, <http://www.who.int/nutrition/nlis/en/>.

7-3: Undernourishment, 1970-2015 [partial_match]

Fresh review found that the prior reconstruction substituted broad Africa/Asia/World curves for several book regional curves. The

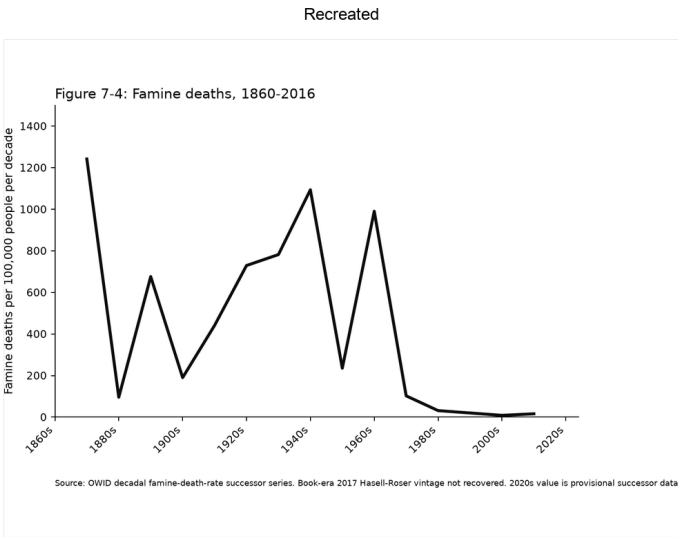

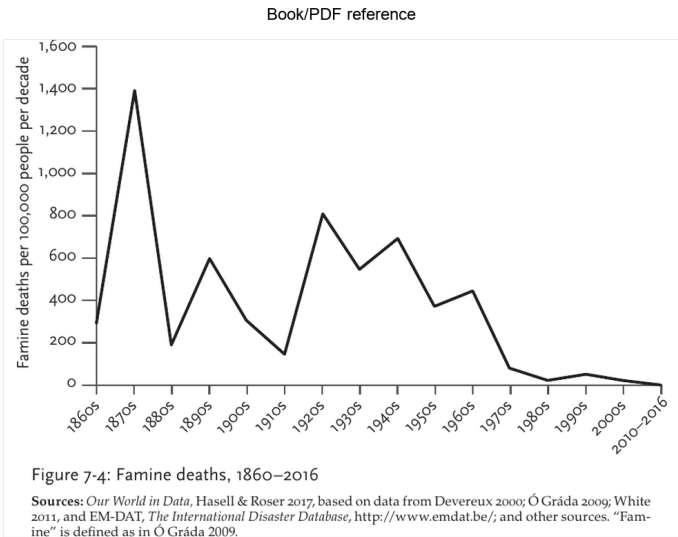

Figure 7-3 extended comparison

7-4: Famine deaths, 1860-2016 [partial_match]

The previous reconstruction recomputed rates from an event table with a current population denominator. Remediation uses OWID's ex

Figure 7-4 extended comparison

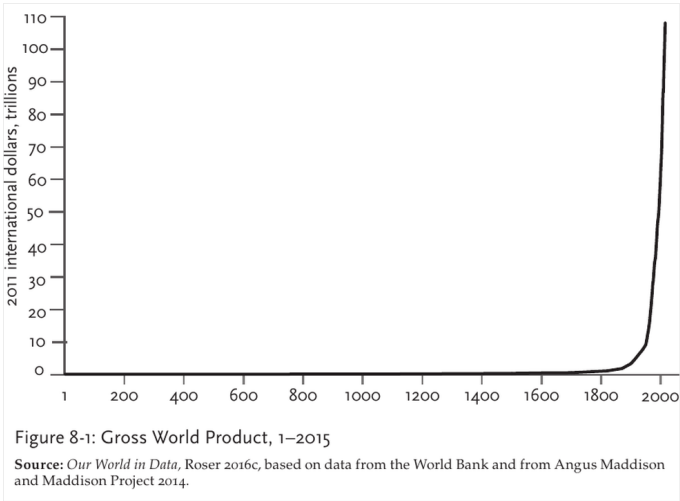

8-1: Gross World Product, 1-2015 [updated_equivalent]

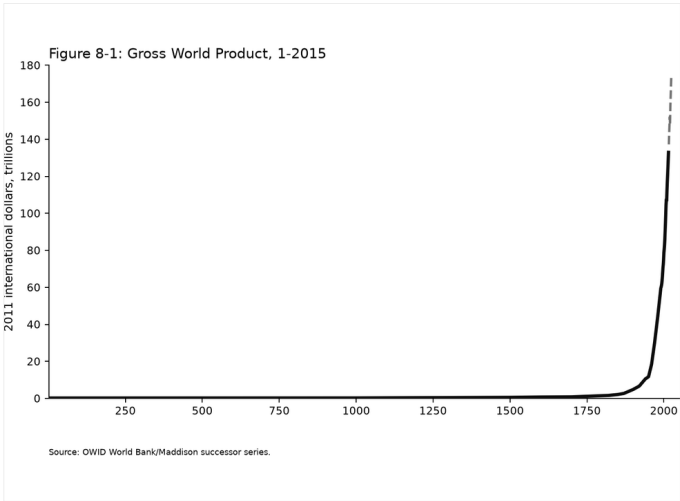

The successor OWID/Maddison/World Bank series preserves the hockey-stick shape and book-period coverage, but the 2015 scale is mat

Recreated

9-4: Social spending, OECD countries, 1880-2016 [updated_equivalent]

For verification, recover the exact OWID Ortiz-Ospina & Roser 2016b/2017 chart data snapshot; otherwise keep updated_equivalent st

Figure 9-4 extended comparison

Book reference

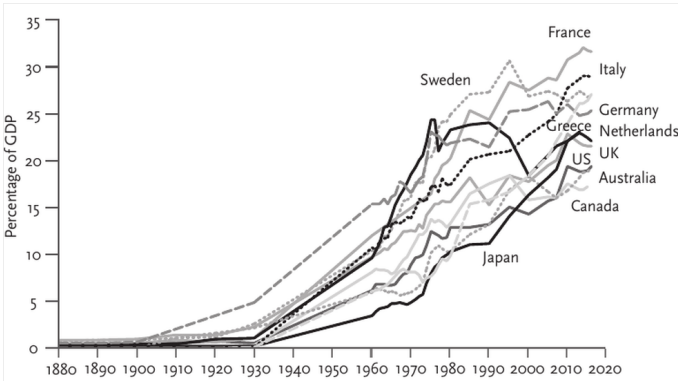

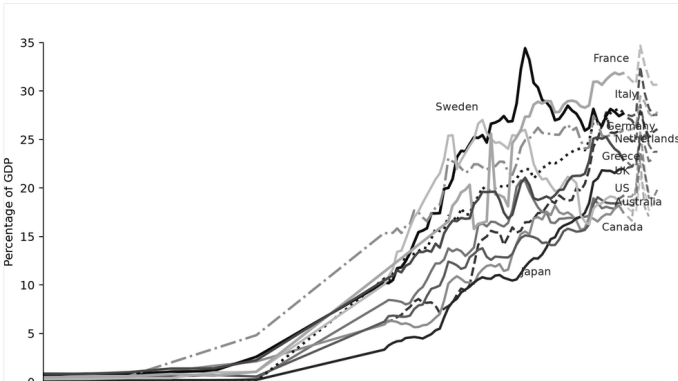

Figure 9-4: Social spending, OECD countries, 1880–2016

Source: *Our World in Data*, Ortiz-Ospina & Roser 2016b, based on data from Lindert 2004 and OECD 1985, 2014, 2017. The Organisation for Economic Co-operation and Development includes thirty-five democratic states with market economies.

Recreated/status

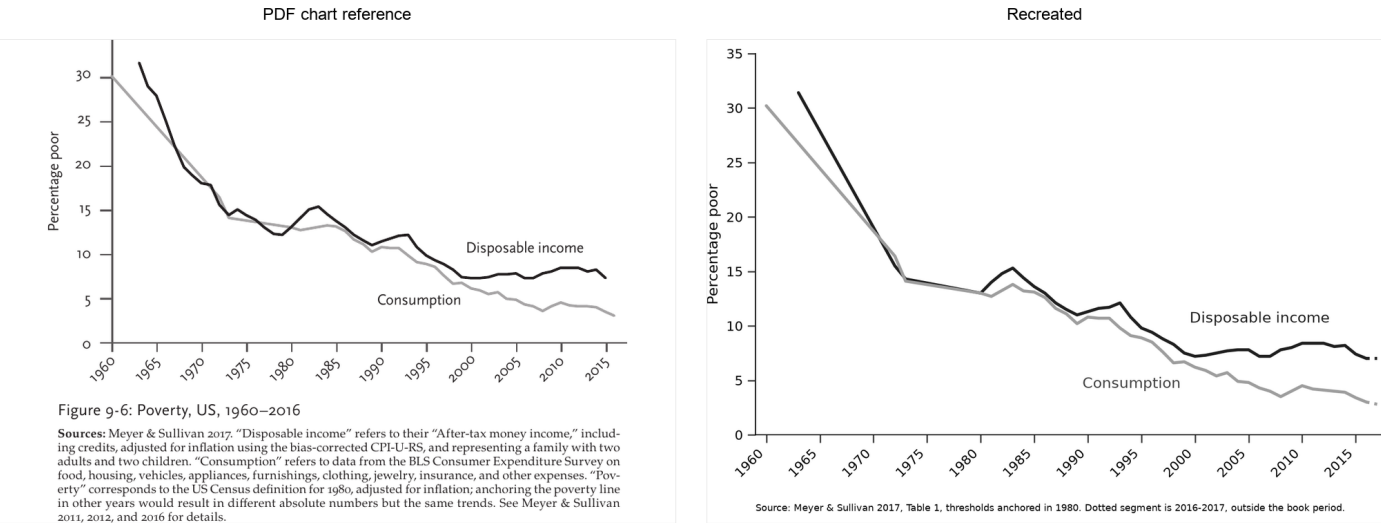

Solid segments show book period through 2016; dashed segments use current OWID/OECD successor data after 2016.

9-6: Poverty, US, 1960-2016 [verified_reproduction]

The cited report was recovered and Table 1 contains the two plotted book-period series. Values are extracted from the source table

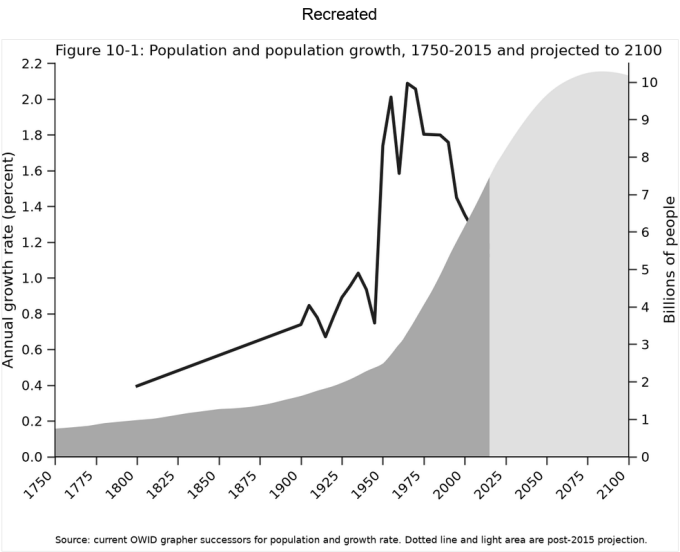

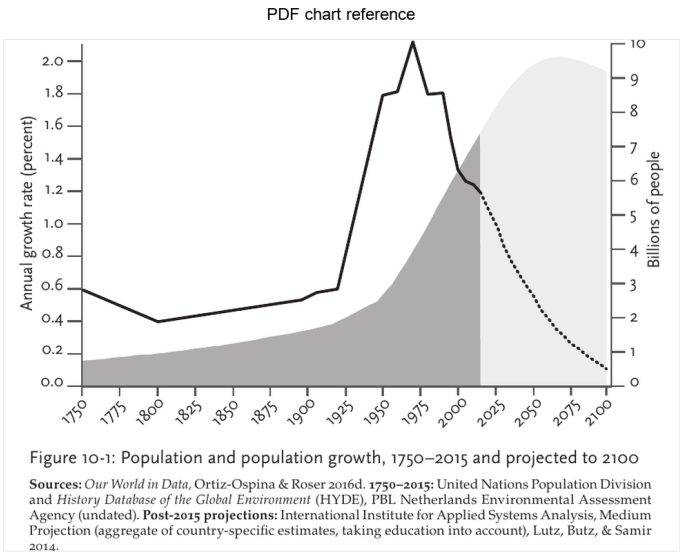

Figure 9-6 extended comparison

10-1: Population and population growth, 1750-2015 and projected to 2100 [updated_equivalent]

Uses current OWID grapher successor data (HYDE 2023, Gapminder 2022, UN WPP 2024) rather than the exact 2016 OWID/HYDE/IIASA source

Figure 10-1 extended comparison

10-5: Oil spills, 1970-2016 [partial_match]

Figure 10-5 original reference

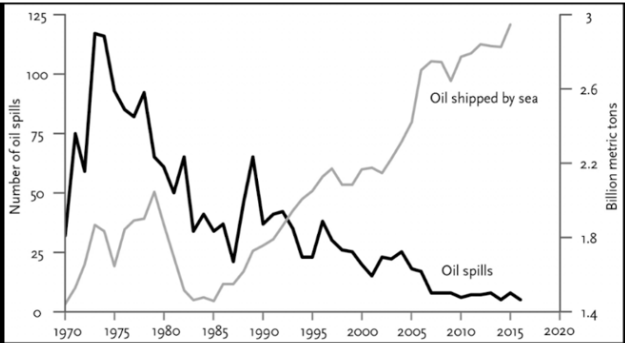

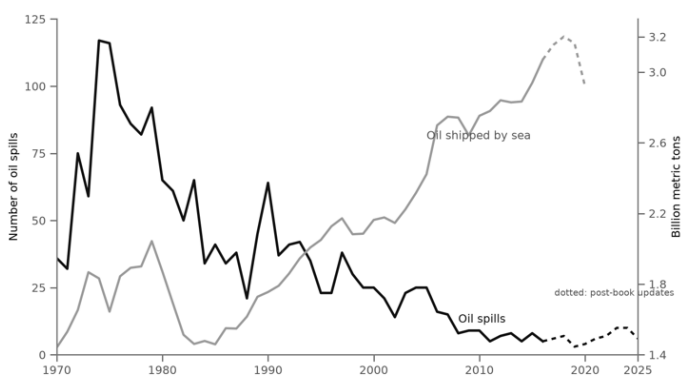

Figure 10-5: Oil spills, 1970–2016

Source: *Our World in Data*, Roser 2016r, based on data (updated) from the International Tanker Owners Pollution Federation, <http://www.itopf.com/knowledge-resources/data-statistics/statistics/>. Oil spills include all those that result in the loss of at least 7 metric tons of oil. Oil shipped consists of “total crude oil, petroleum product, and gas loaded.”

Extended reconstruction

Solid: book period through 2016. Dotted: post-book updates; tanker-trade mirror extends to 2020, spill counts to 2025.

Caption

Figure 10-5: Oil spills, 1970-2016, with post-publication updates. The solid black line shows oil spills of at least 7 tonnes during the book period; the solid gray line shows oil shipped by sea / tanker trade during the book period. Book-period spill data come from ITOPF via OWID/Roser, and tanker-trade data come from a recovered annual UNCTADStat- style mirror for World crude oil loaded plus other tanker trade loaded. Dotted segments show post-publication updates: spill counts extend through 2025 and tanker-trade evidence extends through 2020. The tanker-trade extension is continuous with the recovered annual mirror through 2020, but ITOPF's current source trail indicates UNCTADStat data are available through 2023; the accessible live UNCTAD API was not used for 2021-2023 because its overlap values do not match the book/RMT scale. Remaining uncertainty: the exact Roser 2016r/ITOPF data snapshot and a validated 2021-2023 same-scale UNCTAD export remain unresolved.

10-6: Protected areas, 1990-2014 [verified_reproduction]

Figure 10-6 original reference

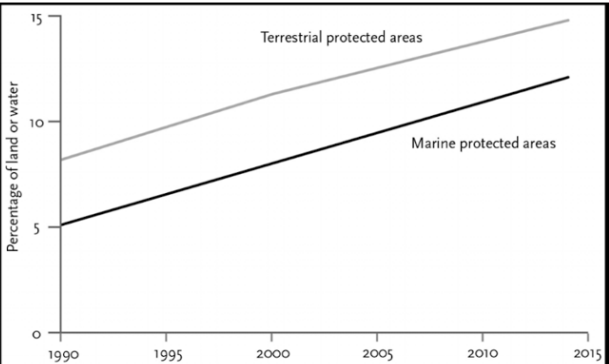

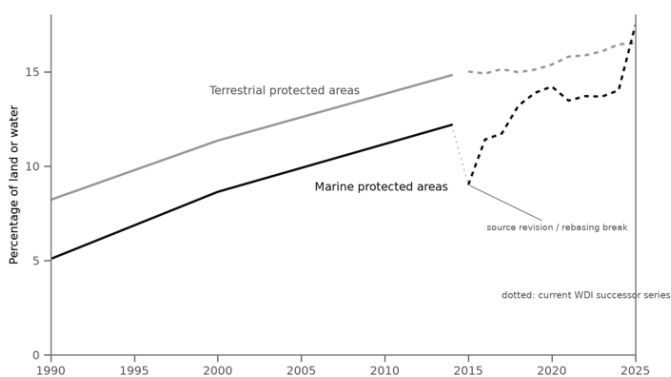

Figure 10-6: Protected areas, 1990–2014

Source: World Bank 2016h and 2017, based on data from the United Nations Environment Programme and the World Conservation Monitoring Centre, compiled by the World Resources Institute.

Extended reconstruction

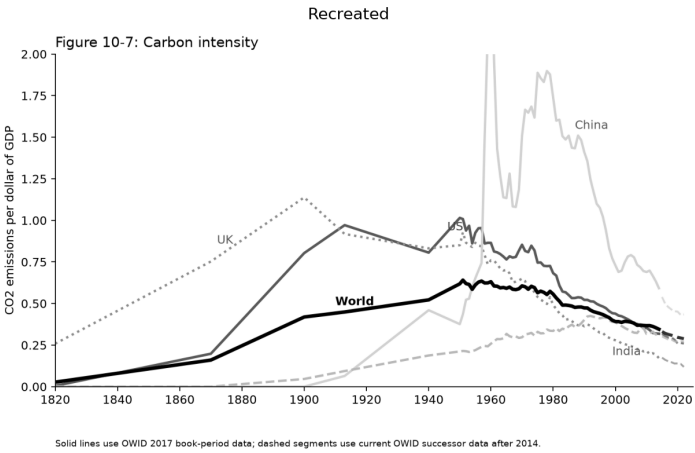

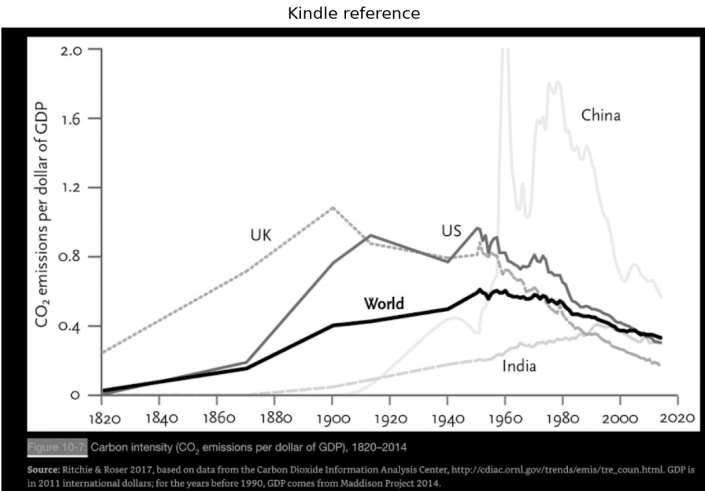

Solid: archived WDI 2017 book period. Dotted: current WDI successor values; marine break reflects source revision/rebasing, not plotting error.

Caption

Figure 10-6: Protected areas, 1990-2014, with post-publication updates. Solid lines reproduce the book period from the archived World Bank WDI bulk ZIP captured by the Internet Archive on 2017-10-12; gray is terrestrial protected areas and black is marine protected areas. Dotted lines show current World Bank WDI successor values after the book period, based on newer Protected Planet / WDPA / WD-OECM source metadata. The dotted extension is not continuous with the archived book-period source: the marine series visibly jumps downward because archived WDI reports 12.18% for 2014, while current WDI reports 8.30% for 2014 and 9.01% for 2015. This discontinuity reflects source revision or rebasing, not a plotting error. Remaining uncertainty: a post-2014 release that is methodologically continuous with the archived 2017 WDI book-period values has not been recovered.

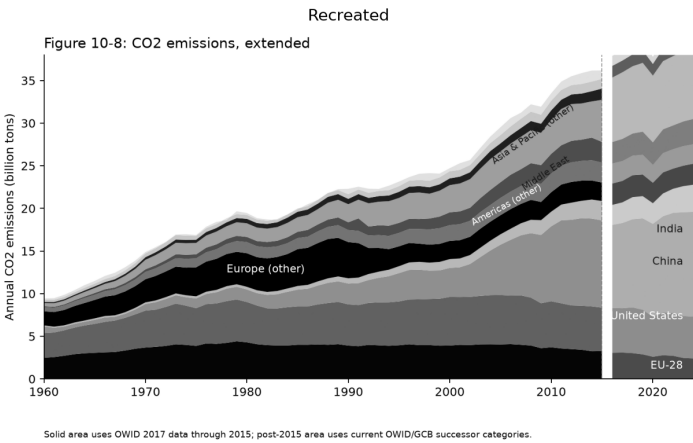

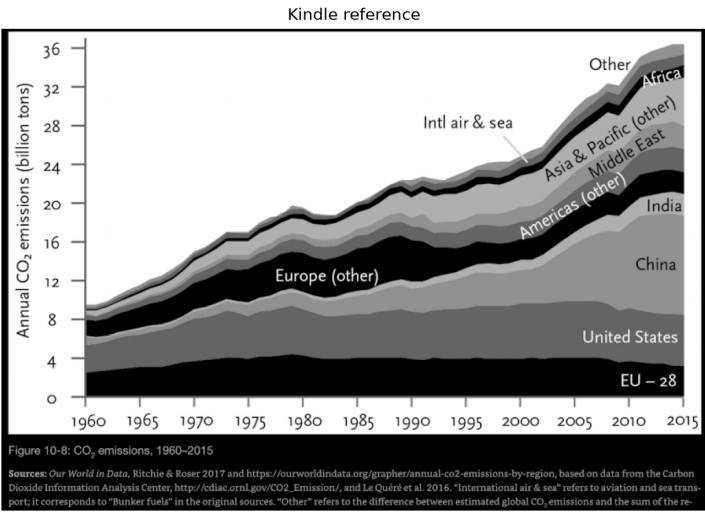

10-7: Carbon intensity (CO2 emissions per dollar of GDP), 1820-2014 [verified_reproduction]

Figure 10-7 extended comparison

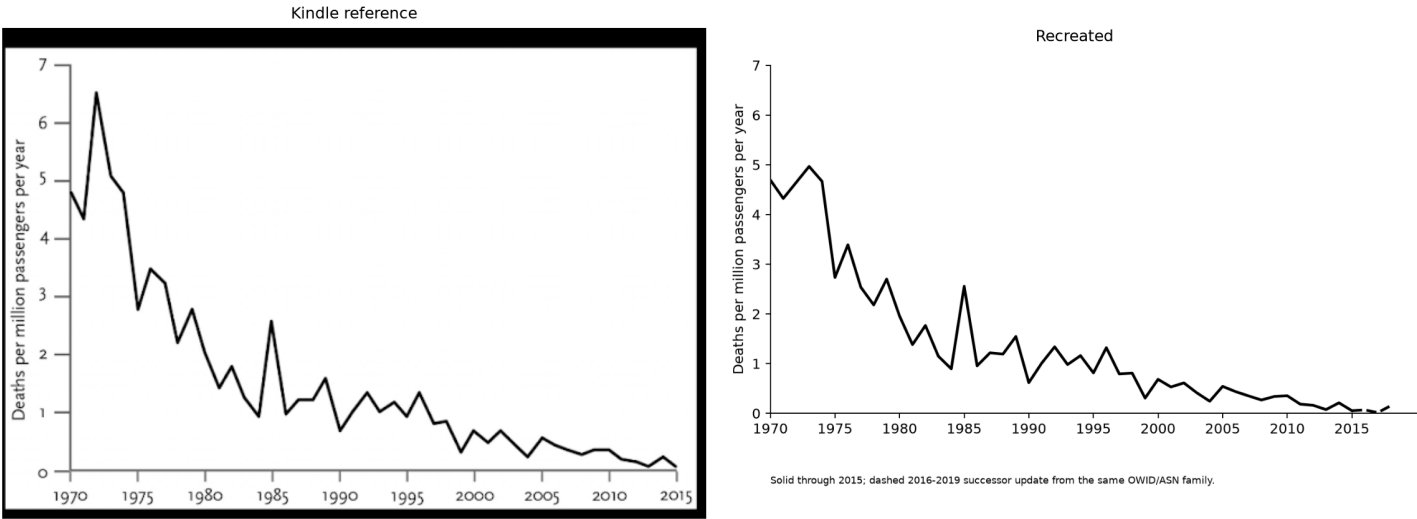

10-8: CO2 emissions, 1960-2015 [verified_reproduction]

Figure 10-8 extended comparison

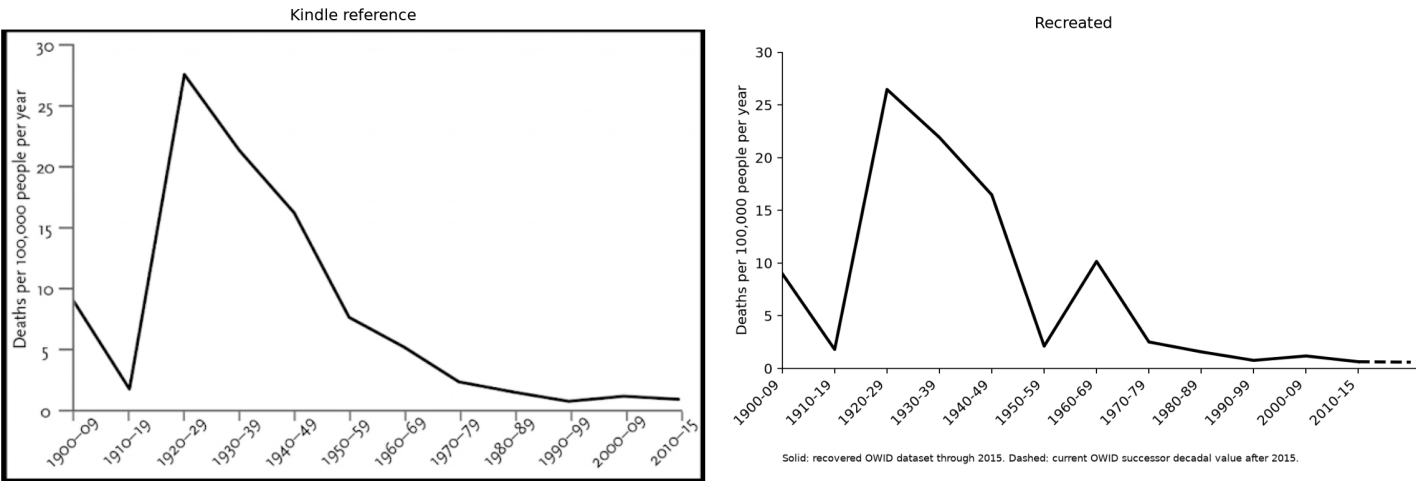

12-5: Plane crash deaths, 1970-2015 [partial_match]

Figure 12-5 extended comparison

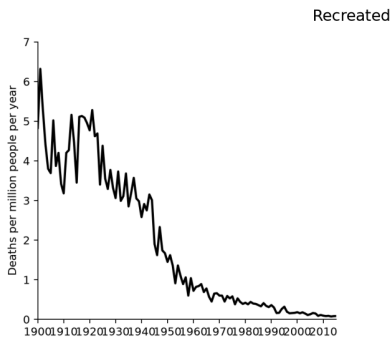

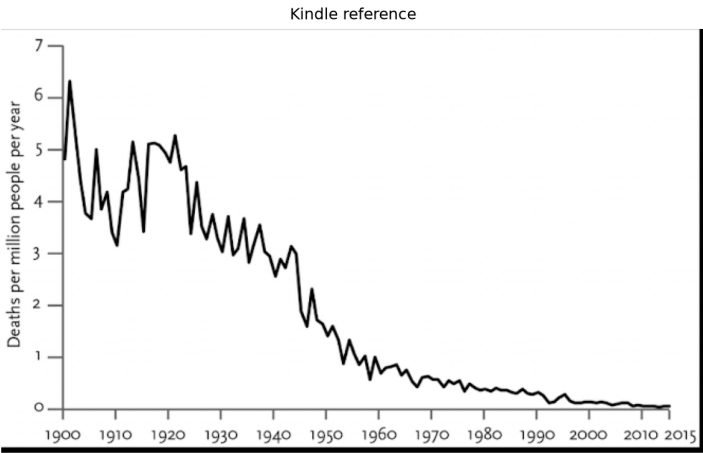

12-8: Natural disaster deaths, 1900-2015 [updated_equivalent]

Figure 12-8 extended comparison

12-9: Lightning strike deaths, US, 1900-2015 [verified_reproduction]

Figure 12-9 extended comparison

Source: OVID/Roser 2016q-style NOAA and Lopez & Holle lightning fatality-rate dataset. No methodologically identical post-2015 extension was recovered in this pass.

19-1: Nuclear weapons, 1945-2015 [partial_match]

Actual Kindle chart-page capture is now present. The reconstruction remains partial because it uses a current OWID successor line

Figure 19-1 extended comparison
