

Pinker Charts - Recreated Figure Comparison Review

Continuous review PDF generated from the consolidated production-loop repository state. Each page uses the most complete available side-by-side comparison for figures with real reconstructed comparisons. Source-recovery-only figures without reconstructed comparison artifacts are excluded.

Figure	Status	Selected comparison	Repository path
5-1	verified_reproduction	figure_5_1_extended_comparison.png	figures/5-1/plots/comparisons/figure_5_1_extended_comparison.png
5-2	partial_match	figure_5_2_extended_comparison.png	figures/5-2/plots/comparisons/figure_5_2_extended_comparison.png
5-3	partial_match	figure_5_3_extended_comparison.png	figures/5-3/plots/comparisons/figure_5_3_extended_comparison.png

1. Figure 5-1: Life expectancy, 1771-2015

Status: verified_reproduction | Selected: figure_5_1_extended_comparison.png

Book-period reconstruction is verified. The extended artifact intentionally plots no successor segment because a comparable regional successor series has not been accepted.

Figure 5-1 extended comparison

PDF chart reference

Figure 5-1: Life expectancy, 1771–2015

Sources: *Our World in Data*, Roser 2016n, based on data from Riley 2005 for the years before 2000 and from the World Health Organization and the World Bank for the subsequent years. Updated with data provided by Max Roser.

Recreated

Source: OWID/Roser 2016n historical dataset. No comparable regional extension plotted; see caption.

2. Figure 5-2: Child mortality, 1751-2013

Status: partial_match | Selected: figure_5_2_extended_comparison.png

Remediated to use the current OWID selected child-mortality grapher directly in percent units. This materially improves the visual match, but the exact Roser 2016a UN/HMD vintage remains unrecovered.

Figure 5-2 extended comparison

PDF chart reference

Figure 5-2: Child mortality, 1751–2013

Sources: Our World in Data, Roser 2016a, based on data from the UN Child Mortality estimates, <http://www.childmortality.org/>, and the Human Mortality Database, <http://www.mortality.org/>.

Recreated

Improved proxy: current OWID selected child-mortality grapher; exact Roser 2016a vintage unrecovered.

3. Figure 5-3: Maternal mortality, 1751-2013

Status: partial_match | Selected: figure_5_3_extended_comparison.png

Track A health/nutrition batch. Source status: updated_equivalent.

Figure 5-3 extended comparison

PDF chart reference

Figure 5-3: Maternal mortality, 1751–2013

Source: Our World in Data, Roser 2016p, based partly on data from Claudia Hanson of Gapminder, <https://www.gapminder.org/data/documentation/gdo10/>.

Recreated

Figure 5-3: Maternal mortality, 1751-2013

Proxy: current OWID maternal-mortality ratio converted from per 100,000 births to percent.

4. Figure 5-4: Life expectancy, UK, 1701-2013

Status: needs_targeted_source_recovery | Selected: figure_5_4_extended_comparison.png

Track A health/nutrition batch. Source status: needs_targeted_source_recovery.

Figure 5-4 extended comparison

PDF chart reference

Figure 5-4: Life expectancy, UK, 1701–2013

Sources: *Our World in Data*, Roser 2016n. Data before 1845 are for England and Wales and come from OECD Clio Infra, van Zanden et al. 2014. Data from 1845 on are for mid-decade years only, and come from the *Human Mortality Database*, <http://www.mortality.org/>.

Recreated

Partial reconstruction only: exact HMD age-1/5/10/20/30/40/50/60/70 series not recovered.

5. Figure 6-1: Childhood deaths from infectious disease, 2000-2013

Status: blocked_external_source | Selected: figure_6_1_extended_comparison.png

Track A health/nutrition batch. Source status: blocked_external_source.

Figure 6-1 extended comparison

PDF chart reference

Figure 6-1: Childhood deaths from infectious disease, 2000–2013

Source: Child Health Epidemiology Reference Group of the World Health Organization, Liu et al. 2014, supplementary appendix.

Recreated

6. Figure 7-1: Calories, 1700-2013

Status: partial_match | Selected: figure_7_1_extended_comparison.png

Track A health/nutrition batch. Source status: updated_equivalent.

Figure 7-1 extended comparison

PDF chart reference

Figure 7-1: Calories, 1700–2013

Sources: United States, England, and France: *Our World in Data*, Roser 2016d, based on data from Fogel 2004. China, India, and the World: Food and Agriculture Organization of the United Nations, <http://www.fao.org/faostat/en/#data>.

Recreated

Source: OWID calories dataset based on FAO and historical sources; post-2013 values are successor continuation.

7. Figure 7-2: Childhood stunting, 1966-2014

Status: partial_match | Selected: figure_7_2_extended_comparison.png

Track A health/nutrition batch. Source status: partial_match.

Figure 7-2 extended comparison

Figure 7-2: Childhood stunting, 1966–2014

Source: *Our World in Data*, Roser 2016j, based on data from the World Health Organization's *Nutrition Landscape Information System*, <http://www.who.int/nutrition/nlis/en/>.

8. Figure 7-3: Undernourishment, 1970-2015

Status: partial_match | Selected: figure_7_3_extended_comparison.png

Fresh review found that the prior reconstruction substituted broad Africa/Asia/World curves for several book regional curves. The remediation replaces those with current FAO successor regional entities where available, but the exact Roser 2016j/FAO 2014 regional vintage and 1991-1999 regional segments remain unrecovered.

Figure 7-3 extended comparison

Book/PDF reference

Recreated

9. Figure 7-4: Famine deaths, 1860-2016

Status: partial_match | Selected: figure_7_4_extended_comparison.png

The previous reconstruction recomputed rates from an event table with a current population denominator. Remediation uses OWID's explicit decadal famine-death-rate grapher series, which fixes the aggregation treatment, but it is a 2025 World Peace Foundation/OWID successor rather than the archived 2017 Hasell-Roser book vintage.

Figure 7-4 extended comparison

10. Figure 8-1: Gross World Product, 1-2015

Status: updated_equivalent | Selected: figure_8_1_extended_comparison.png

The successor OWID/Maddison/World Bank series preserves the hockey-stick shape and book-period coverage, but the 2015 scale is materially above the printed figure's apparent endpoint, so this is an updated equivalent rather than an exact reproduction.

Figure 8-1 extended comparison

Book/PDF reference

Figure 8-1: Gross World Product, 1–2015

Source: *Our World in Data*, Roser 2016c, based on data from the World Bank and from Angus Maddison and Maddison Project 2014.

Recreated

Source: OWID World Bank/Maddison successor series.

11. Figure 8-2: GDP per capita, 1600-2015

Status: updated_equivalent | Selected: figure_8_2_extended_comparison.png

The selected countries and line ordering broadly match the book, but current Maddison 2020/OWID data are not the cited Maddison Project 2014/World Bank 2016 vintage. Remaining differences are not typography-only.

Figure 8-2 extended comparison

Book/PDF reference

Recreated

12. Figure 8-4: Extreme poverty (proportion), 1820-2015

Status: verified_reproduction | Selected: figure_8_4_extended_comparison.png

Book-period reconstruction is verified. The comparison layout was remediated so the recreated plot area is comparable to the Kindle crop; no comparable world extension is plotted.

Figure 8-4 extended comparison

Kindle reference

Recreated

13. Figure 8-5: Extreme poverty (number), 1820-2015

Status: verified_reproduction | Selected: figure_8_5_extended_comparison.png

A falsification audit found no material source, encoding, or endpoint issue. The reconstruction uses the cited OWID historical absolute-count series and matches the stacked-area visual claim; remaining differences are production styling only.

Figure 8-5 extended comparison

Book/PDF reference

Recreated

14. Figure 9-4: Social spending, OECD countries, 1880-2016

Status: updated_equivalent | Selected: figure_9_4_extended_comparison.png

For verification, recover the exact OWID Ortiz-Ospina & Roser 2016b/2017 chart data snapshot; otherwise keep updated_equivalent status.

Figure 9-4 extended comparison

Book reference

Recreated/status

Figure 9-4: Social spending, OECD countries, 1880–2016

Source: *Our World in Data*, Ortiz-Ospina & Roser 2016b, based on data from Lindert 2004 and OECD 1985, 2014, 2017. The Organisation for Economic Co-operation and Development includes thirty-five democratic states with market economies.

Solid segments show book period through 2016; dashed segments use current OWID/OECD successor data after 2016.

15. Figure 10-5: Oil spills, 1970-2016

Status: partial_match | Selected: figure_10_5_extended_comparison_captioned.png

Current repository state: oil-spill line supported; exact annual oil-shipping gray-line source unresolved. See figures/10-5/.

Figure 10-5 original reference

Figure 10-5: Oil spills, 1970–2016

Source: *Our World in Data*, Roser 2016r, based on data (updated) from the International Tanker Owners Pollution Federation, <http://www.itopf.com/knowledge-resources/data-statistics/statistics/>. Oil spills include all those that result in the loss of at least 7 metric tons of oil. Oil shipped consists of "total crude oil, petroleum product, and gas loaded."

Extended reconstruction

Solid: book period through 2016. Dotted: post-book updates; tanker-trade mirror extends to 2020, spill counts to 2025.

Caption

Figure 10-5: Oil spills, 1970-2016, with post-publication updates. The solid black line shows oil spills of at least 7 tonnes during the book period; the solid gray line shows oil shipped by sea / tanker trade during the book period. Book-period spill data come from ITOPF via OWID/Roser, and tanker-trade data come from a recovered annual UNCTADStat-style mirror for World crude oil loaded plus other tanker trade loaded. Dotted segments show post-publication updates: spill counts extend through 2025 and tanker-trade evidence extends through 2020. The tanker-trade extension is continuous with the recovered annual mirror through 2020, but ITOPF's current source trail indicates UNCTADStat data are available through 2023; the accessible live UNCTAD API was not used for 2021-2023 because its overlap values do not match the book/RMT scale. Remaining uncertainty: the exact Roser 2016r/ITOPF data snapshot and a validated 2021-2023 same-scale UNCTAD export remain unresolved.

16. Figure 10-6: Protected areas, 1990-2014

Status: verified_reproduction | Selected: figure_10_6_extended_comparison_captioned.png

Current repository state: archived WDI 2017 source verifies book-period reconstruction; extension is successor current WDI series. See figures/10-6/.

Figure 10-6 original reference

Figure 10-6: Protected areas, 1990–2014

Source: World Bank 2016h and 2017, based on data from the United Nations Environment Programme and the World Conservation Monitoring Centre, compiled by the World Resources Institute.

Extended reconstruction

Solid: archived WDI 2017 book period. Dotted: current WDI successor values; marine break reflects source revision/rebasing, not plotting error.

Caption

Figure 10-6: Protected areas, 1990-2014, with post-publication updates. Solid lines reproduce the book period from the archived World Bank WDI bulk ZIP captured by the Internet Archive on 2017-10-12; gray is terrestrial protected areas and black is marine protected areas. Dotted lines show current World Bank WDI successor values after the book period, based on newer Protected Planet / WDPA / WD-OECM source metadata. The dotted extension is not continuous with the archived book-period source: the marine series visibly jumps downward because archived WDI reports 12.18% for 2014, while current WDI reports 8.30% for 2014 and 9.01% for 2015. This discontinuity reflects source revision or rebasing, not a plotting error. Remaining uncertainty: a post-2014 release that is methodologically continuous with the archived 2017 WDI book-period values has not been recovered.

17. Figure 10-7: Carbon intensity (CO2 emissions per dollar of GDP), 1820-2014

Status: verified_reproduction | Selected: figure_10_7_extended_comparison.png

Book-period source and visual geometry closely match. Extension is useful but explicitly successor-series only.

Figure 10-7 extended comparison

18. Figure 10-8: CO2 emissions, 1960-2015

Status: verified_reproduction | Selected: figure_10_8_extended_comparison.png

Book-period stack uses the exact OWID 2017 regional CDIAC dataset named by the source chain. Extension is visually separated by a 2015 boundary because source definitions changed.

Figure 10-8 extended comparison

19. Figure 12-5: Plane crash deaths, 1970-2015

Status: partial_match | Selected: figure_12_5_extended_comparison.png

Track D 2026-06-30: source-family reconstruction generated from OWID-hosted ASN 2019 successor data and World Bank passengers; early-1970s visual peak under-matches.

Figure 12-5 extended comparison

20. Figure 12-8: Natural disaster deaths, 1900-2015

Status: updated_equivalent | Selected: figure_12_8_extended_comparison.png

Track D 2026-06-30: OWID datasets repo EM-DAT death-rate reconstruction generated; current OWID successor extension added.

Figure 12-8 extended comparison

21. Figure 12-9: Lightning strike deaths, US, 1900-2015

Status: verified_reproduction | Selected: figure_12_9_extended_comparison.png

Track D 2026-06-30: OWID NOAA/Lopez-Holle fatality-rate dataset visually reproduces Kindle chart; no comparable post-2015 rate extension recovered.

Figure 12-9 extended comparison

Source: OWID/Roser 2016q-style NOAA and Lopez & Holle lightning fatality-rate dataset. No methodologically identical post-2015 extension was recovered in this pass.

22. Figure 19-1: Nuclear weapons, 1945-2015

Status: partial_match | Selected: figure_19_1_extended_comparison.png

Actual Kindle chart-page capture is now present. The reconstruction remains partial because it uses a current OWID successor line series rather than the cited HumanProgress/FAS 2016 table and does not reproduce the book's stacked-area presentation.

Figure 19-1 extended comparison
